EDUCATION

North Carolina State University

August 2022 – May 2026

Bachelor of Science in Computer Science, Minor in Cognitive Science

Raleigh, NC

Relevant Coursework: Software Engineering (Java), Data Structures and Algorithms, Responsible and Efficient Deep Learning (Python), Operating Systems (C), Senior Design Project

EXPERIENCE

Software Engineer Intern

June 2025 – August 2025

Cisco (Enterprise AI Team)

Raleigh, NC

- Built a Python real-time analytics tool for Cisco's AI Sales Assistant, enabling fast querying over 8M+ log events
- Designed optimized SQL pipelines in Google Cloud BigQuery (GCP), reducing query latency by 83% via clustering
- Developed an API adoption assistant with Swagger REST APIs, helping 300+ employees leverage internal AI tools
- Enhanced production reliability by debugging live issues and shipping fixes through CI/CD pipelines

AI Software Engineer Intern

May 2024 – July 2024

U.S. Department of Energy

Richland, WA

- Engineered a RAG tool to retrieve data on 200K+ cyber threats (CVE, CWE, ATT&CK) using a vector database
- Implemented CVE-ATT&CK mappings with LlamaIndex, simplifying retrieval and boosting LLM speed by 64%
- Developed Python pipelines for vector embedding relationships, enhancing structured access to cyber threat data
- Co-authored a peer-reviewed publication on advanced RAG systems in cyber defense, contributing significant improvements to threat analysis and real-time data retrieval (PNNL-36792)

Data Science Intern

June 2023 – April 2024

Siemens

Cary, NC

- Analyzed workflows and uncovered systematic inefficiencies across 90K+ medical instrument orders using Celonis
- Used process mining and predictive fault detection to identify delivery problems, cutting operational delays by 31%
- Leveraged MongoDB and unsupervised learning to identify recurring fault patterns in 300+ service tickets
- Built an automated reporting system with PowerBI, streamlining issue tracking over 12 months of production data

PROJECTS

Spotify Story Insights Platform | OAuth, REST APIs, React

September 2025 – December 2025

- Built a full-stack analysis tool using Spotify OAuth 2.0 to transform raw playlist data into a three-act visual narrative modeling evolving user music preferences
- Implemented a Spotify API data pipeline to aggregate and normalize playlist metadata for fast client-side analysis
- Integrated AI-generated storytelling to deliver personalized insights and improve overall user engagement

Snapbot - LLM Tutor | Docker, REST APIs, LangChain

December 2024 – April 2025

- Built a RAG-based LLM tutor to provide assistance to 40+ K-12 students learning block-based programming
- Integrated Ollama REST APIs for efficient NLP processing and used Docker for seamless multi-system deployment
- Improved student content understanding by 27% through context-aware guidance and low-latency inference

Engagement Manager – Consult Your Community | Scrum, Jira, React

October 2023 – Present

- Shipped end-to-end technical and product solutions for a 501(c)(3) nonprofit across 7 local businesses in Raleigh
- Led a team of 6 analysts to deliver a full-scale website design with React, driving a 2.5× increase in monthly traffic
- Helped raise \$10K+ to launch a campus-wide small business fair featuring 80+ local businesses, supporting real-world user adoption and community engagement

TECHNICAL SKILLS

Languages: Java, Python, C, C++, SQL (MySQL), HTML, CSS, JavaScript, TypeScript

Frameworks: REST APIs, LlamaIndex, LangChain, Langgraph, HuggingFace, Node.js, JUnit, React.js

Tools: Git, VS Code, Eclipse, Jenkins, Postman, BigQuery, MongoDB (NoSQL), Power BI, Docker, Celonis

Libraries: Pandas, PyTorch, Streamlit, OpenAI API, Flask, NumPy
