

KRISHANG KHANDELWAL

krkhandelwal@ucsd.edu | 9821 Genesee Avenue, San Diego, CA | +1-(858) 329-9971

EDUCATION

University of California San Diego, Halicioğlu Data Science Institute

Expected 2028

B.S. in Data Science and Cognitive Science (Machine Learning Specialization), Minor in Mathematics

San Diego, CA

- Relevant Coursework: Intro to Data Science, Principles of Data Science, Programming and basic Data Structures, Data Structures and Algorithms (Java), Theoretical Foundations of Data Science I& II, Cognitive Consequences of Technology

EXPERIENCE

Truminds Software Systems

Delhi, NCR

Machine Learning Engineer Intern

June 2025 – August 2025

- Fine-tuned a **Transformer**-based Small Language Model using **PyTorch**, implementing **tokenization** pipelines, **training loops**, and GPU-accelerated **supervised learning** for domain-specific text generation and **inference**.
- Built end-to-end **NLP** preprocessing and embedding pipelines and trained sequence models (**LSTM**, **GRU**, **Seq2Seq**) using **PyTorch** for structured text modeling tasks.
- Implemented core **Transformer** architecture components including tokenization, **self-attention** mechanisms, and **layer normalization** for language model training and inference.
- Deployed trained models as **REST APIs** using **Flask**, implementing **inference endpoints** and **JSON** request/response pipelines for real-time predictions.

Truminds Software Systems

Delhi, NCR

Software development intern

June 2022 – August 2022

- Built a network **monitoring dashboard** using **InfluxDB** inside **Docker** containers to store and visualize **time-series** system performance metrics.
- Optimized **real-time data pipelines** to improve **throughput** and **latency** of system performance metrics ingestion.
- Debugged** and tested **backend** monitoring services, improving system reliability across **distributed network** environments.
- Worked within an **Agile** development cycle using **Git** version control, participating in **code reviews**, **debugging sessions**, and **iterative feature releases**.

Faircent.com

Delhi, NCR

Product Management intern

March 2022 – May 2022

- Designed onboarding **user flows** and wireframes in **Figma** for a DSA **customer acquisition** feature, improving usability and conversion flow clarity.
- Worked **cross-functionally** with product managers and engineers to translate **business requirements** into technical **UI specifications**.
- Conducted **user research** and **usability testing** to iterate on onboarding experience and improve **user retention**.

Independent Research

Urbana Champagne, IL (Hybrid)

Researcher

August 2023 – November 2023

- Analyzed NBA end-of-quarter decision making using **statistical modeling** and **machine learning** on large play-by-play datasets.
- Built a **web scraper** and constructed a dataset of ~77K plays (~5K possessions), **engineering features** for “point differential” performance metrics.
- Performed scenario-based **statistical analysis** and **visualization** in **Python** using **pandas**, **NumPy**, and **matplotlib** to identify scoring patterns.
- Trained a **Random Forest regression** model to predict possession outcomes and conducted feature importance and correlation analysis (~67% prediction accuracy).

Champions4Change.org

Delhi, NCR

Founder

January 2019 – 2025

- Founded and built a **crowdfunding platform** enabling community fundraising and campaign management for youth-led initiatives.
- Scaled platform to **1,200+** users and **75+** campaign creators through outreach and user engagement strategies.
- Managed **product lifecycle** including feature development, **onboarding flows**, and **user acquisition strategy**.
- Coordinated campaign launches and community operations to support recurring fundraising activity.

EXTRACURRICULAR ACTIVITIES

Fake Tweet Checker – Winner & member of DS3, Data Science Students Society UCSD Hackathon

San Diego, CA

University of California, San Diego Data Science Students Society Hackathon

April 2025

- Built and deployed a real-time misinformation detection web app using **machine learning** and a **Streamlit** interface
- Trained a text classification model on labeled tweet datasets and served predictions through a **Flask REST API** for **live inference**
- Implemented user input processing and **frontend pipeline** enabling instant real/fake classification feedback
- Won **1st place** out of 50+ teams for technical implementation, innovation, and real-world applicability

Quantitative Analyst — Sustainable Investment Group UCSD

San Diego, CA

University of California, San Diego Data Sustainable Invest Group

April 2025 – Present

- Pulled historical equity data using the **Yahoo Finance API** and built financial models in **Python** using time-series forecasting (**ARIMA**, **GARCH**) and risk metrics (rolling **Sharpe ratio**)
- Developed valuation models including **DCF** and comparable company analysis to generate investment theses
- Backtested strategies and analyzed market data using **pandas** and **NumPy**
- Collaborated in a team stock pitch and **won** internal investment competition for a Netflix valuation thesis

Project Lead— Eclipse Analytics Club UCSD

University of California, San Diego - Sports Analytics Club

San Diego, CA
April 2025 – Jan 2026

- Led analytics team performing **data cleaning**, **EDA**, and **feature engineering** in **Python** to evaluate player and team performance
- Reviewed code and refined performance metrics to support tactical decision-making
- Analyzed opponent tendencies for UCSD Men’s Basketball using **spatial analysis** and game-film tracking
- Generated scouting insights from **visual tracking** and play pattern analysis

Computer Science & AI Coursework

Student- CS50x (Harvard University) & Veritas AI Scholars Program

Remote
May 2020 – July 2020

- Completed Harvard’s CS50x: *Introduction to Computer Science*, gaining proficiency in **C**, **Python**, **JavaScript**, **HTML**, and **CSS**.
- Explored foundational computing concepts including **arrays**, **data structures**, **algorithms**, and **memory management**.
- Selected as a Veritas AI Scholar; studied **machine learning** topics such as **linear/logistic regression**, **decision trees**, and **neural networks**.
- Built an image classification model using **Convolutional Neural Networks (CNNs)** trained on the **CIFAR-10** dataset

SKILLS & INTERESTS

Languages and Tools: English (native), Hindi (native) | Excel, Word, PowerPoint, Canva, Figma | Python, Java
Interests: Sports analytics, Golf, Music, Soccer, Basketball, Guitar.
