Education

University of California, San Diego
Bachelor of Science in Data Science

San Diego, CA
Sept. 2024 – June 2028

Experience

Tutor & Data Entry Operator
Kumon North America, Inc.

June 2023 – Aug. 2024
Northridge, CA

- Communicated concepts clearly by delivering personalized explanations in math and reading, helping students build confidence and master challenging material.
- Worked directly with parents, students, and staff to discuss progress, clarify expectations, and ensure alignment on academic goals.
- Created progress charts and reports, transforming student performance data into clear, actionable insights for both staff and families.

Projects

SayStroop — Award-Winning Cognitive Science Web App

Dec. 2024 – Mar. 2025

Python, Streamlit, Supabase, OpenAI Whisper, NumPy

GitHub: github.com/SeojunJaden/SayStroop

- Developed a full-stack website that conducts the Stroop Test using voice-based reaction-time measurements with automated audio segmentation.
- Built a custom voice-activity detection pipeline (inspired by Silero VAD) to resolve Whisper timestamp drift, improving reaction-time accuracy across 1500+ samples.
- Implemented participant identity verification and data pipeline using Supabase to prevent duplicate submissions and ensure clean data collection.
- Awarded **2nd place** in the Data Science Student Society's quarterly competition and featured on the **DSSS website** as an award-winning project.

Python PNG Manipulation

Mar. 2025

Python, Sublime

- Designed a custom RGB image class in Python to represent and manipulate pixel-level PNG data.
- Built image-processing tools including negation, grayscale, rotation, pixelation, brightness adjustment, and edge highlighting.
- Developed a KNN image classifier trained on labeled datasets to categorize images using distance-based similarity.

Technical Skills

Languages: Python, Java

Developer Tools: Jupyter Notebook, Sublime, IntelliJ, SPSS

Libraries: pandas, NumPy, Matplotlib
