EDUCATION

University of California, San Diego

B.S. Data Science

San Diego, CA

Expected Graduation: June 2027

- Cumulative GPA: 3.95
- Relevant Courses: Data Science Principles, Intermediate Python, Data Structures & Algorithms, Problem Solving in C++, The Practice and Application of Data Science

PROJECTS

Cuisine Classifier

December 2025

- Engineered a scalable data pipeline to clean and transform large-scale recipe datasets using Python and Pandas
- Implemented a Random Forest model and used TF-IDF vectorization to analyze ingredient patterns
- Used permutation tests to evaluate health differences and model fairness across cuisine groups
- Optimized model performance with hyperparameter tuning using grid search and cross-validation techniques

YumSum

October 2023 - May 2024

- Created a restaurant recommender engine utilizing cost, location, and user sentiment
- Developed a text summarization algorithm to process user reviews
- Collaborated with a team of 4 other students
- One of 8 projects chosen to present in front of industry leaders (Microsoft, Amgen)

Learn. Fight. Protect.

June 2021

- Created a website using CSS, HTML, and JavaScript that aimed to educate about gun safety in the U.S.
- Implemented fact generator button that used real-life statistics gathered from data collection

EXPERIENCE

Math Tutor

August 2022 - June 2023

Quarantutors

San Diego, CA

- Tutored high school students in 10th grade level Algebra and Trigonometry
- Provided feedback to students using positive reinforcement techniques to encourage, motivate, and build confidence
- Adapted my teaching style to each student by coming up with innovative ways to teach new concepts and ideas

Leadership Intern

June 2021

Camp Invention

San Diego, CA

- Aided elementary school students in learning engineering concepts
- Created last minute solutions to accidents and issues within short spans of time
- Organized games and activities that creatively taught mathematical concepts

SKILLS

Programming Languages: Python (Advanced), SQL, C++, HTML, CSS/JavaScript, Java, R

Libraries: Pandas, Scikit-learn, NumPy, Matplotlib, BeautifulSoup

Tools: Git, Statistical Analysis, Data Cleaning, Jupyter Notebook, Permutation Testing, Web Scraping

Professional Skills: Web Design, Customer Service, Quick Thinking, Communication, Presentation
