

Pali Jain

Brea, CA 92821 714-310-1055 | palijain02@gmail.com | WWW: www.linkedin.com/in/pali-jain-b67405261

University of California, San Diego; B.S. Data Science

Summary

Data Science Intern with strong analytical skills and a proven track record of high productivity. Knowledge in machine learning, statistical analysis, and data visualization. Demonstrated ability in problem-solving and critical thinking, effectively translating data insights into actionable business strategies.

Technical Skills

- Python and C++
- SQL and databases
- Data structures and algorithms
- Object-oriented programming
- Linear algebra and statistics
- Machine learning foundations
- Model optimization
- Data pipelines and mining
- NumPy and Pandas

Experience

- 08/2025 - Current

Superprof Tutor

— Brea, CA

 - Created personalized lesson plans tailored to diverse student needs.
 - Facilitated engaging tutoring sessions across subjects including SAT and Math.
- 06/2023 - 07/2023

Cal Poly Pomona UAV Lab Engineering Intern

— Pomona, CA

 - Developed machine learning algorithms for image recognition to distinguish strawberry plants from weeds, supporting precision agriculture and reducing manual labor.
 - Advanced embedded ML research by analyzing Electric - Vertical Take-Off and Landing Unmanned Aerial Vehicle (E-VTOL UAV) designs and contributing to innovative design strategies.
 - Improved UAV prototype development efficiency by 30% by designing and building 20+ foam and styrofoam UAV models for aerodynamic testing.
 - Increased simulation accuracy by 25% by modeling UAV components in SolidWorks/OpenVSP and validating performance through X-Plane tests.

Education

- Expected graduation: 03/2028

University of California, San Diego

La Jolla, CA

B.S.: Data Science; 3.91 GPA

Leadership And Projects

- TV Show Script Analysis & NLP Project (Friends) - UC San Diego, 2025.** Python, Pandas, NLP, Data Visualization. Analyzed episode- and line-level script data from Friends to explore trends in gender balance, emotional tone, and character dialogue distribution. Performed text preprocessing and exploratory data analysis on thousands of dialogue lines using Python and pandas. Conducted sentiment and emotion analysis to quantify emotional patterns across episodes and seasons. Compared original episodes with reboot-style content to identify narrative and emotional differences. Generated synthetic episode titles using text-based modeling techniques. Created clear visualizations and narrative summaries to communicate findings. <https://github.com/PaliJain/Friends-TV-Script-Analysis-NLP-Project>
- Taylor Swift Song Recommender & Lyrics Analysis – UC San Diego, 2025,** Developed a lyric-based recommender system and analyzed lyrical and album-level trends across Taylor Swift’s discography using Python (Baby pandas, NumPy, Jupyter). Visualized word usage and streaming insights, demonstrating data wrangling, feature extraction, and storytelling through data. <https://github.com/PaliJain/Taylor-Swift-Song-Recommender-Lyrics-Analysis>
- Data Visualization Project – Visualizing YouTube Data with Plotly Express, 2025,** Analyzed a dataset of 1,000+ YouTube channels using Python (Pandas, Plotly Express) in Google Colab. Built interactive histograms, pie charts, and box plots to uncover patterns in subscriber counts, content categories, and channel growth trends. Strengthened skills in data cleaning, exploratory analysis, and storytelling with visualizations. https://colab.research.google.com/drive/1HOuycRvfdNuN-fsp1tp0_j03v6nrhSEC#scrollTo=kTTB5-os484C
- Member, ACM & SWE, Riverside, CA, 09/24 - 06/25,** Accelerated coding project delivery by 30% by collaborating in 20+ technical workshops and contributing to 15 multi-member coding projects covering software engineering and ML applications., Strengthened professional development by networking with industry mentors and participating in cross-club hackathons and events.
- Co-President, Troy Robotics, Fullerton, CA, 08/20 - 05/24,** Boosted competition performance by 30% by leading 50+ members across 6 sub-teams to design, build, and program autonomous robots equipped with ML-based computer vision systems., Secured \$7,000+ in sponsorships from Boeing and Raytheon by organizing outreach initiatives, developing technical pitches, and presenting the team’s innovation strategies to industry partners.
- Co-President, NJROTC Seaperch, Fullerton, CA, 08/21 - 05/24,** Led 6 teams to design, build, and deploy remotely operated underwater vehicles (ROVs) for obstacle courses, mentoring new members in engineering skills and achieving successful competition results. Organized the Los Angeles regional competition, hosting 15+ teams from 5 schools, enhancing leadership, teamwork, and problem-solving skills.

Volunteer Experience

- St. Jude Medical Center, Fullerton, CA, 04/22 - 05/24,** Reduced patient wait times by 20% by streamlining communication and chart workflows for 150+ weekly patients, improving efficiency of medical staff., Enhanced patient experience by providing direct support and ensuring smooth coordination across hospital departments.
