San Ramon, CA | 925-791-3310 | rjksanghvi@gmail.com

SUMMARY

Software and data engineer at UC San Diego focused on building AI-powered, production-grade systems. Experienced in shipping end-to-end ML pipelines, data platforms, and user-facing tools. Strong interest in scalable infrastructure, intelligent agents, and high-impact product engineering.

EDUCATION

University of California, San Diego (UCSD)

Sep 2025 - Jun 2028

B.S. Data Science

- **Coursework:** Linear Algebra, Data Structures, Probability & Statistics, Machine Learning (in progress)

ENGINEERING & PRODUCT SKILLS

- **Languages:** Python, Java, SQL
- **Backend & APIs:** Flask (REST APIs), Data Pipelines, Experimentation Infrastructure
- **Data & ML:** Pandas, NumPy, PyTorch, Scikit-Learn, Feature Engineering, Error Analysis
- **Products & Systems:** Metrics & KPIs, A/B-style Experimentation, Iterative Deployment
- **Tools & Techniques:** Git, Reproducible Analysis, Model Validation

WORK EXPERIENCE

Research Mentorship | *Applied ML Intern*

Jun 2024 - Sep 2024

- Built and maintained an end-to-end NLP pipeline from raw text ingestion to model deployment and evaluation
- Designed feature engineering workflows to improve model robustness and reduce common failure cases
- Conducted systematic error analysis using ROC, F1, and AUC to guide iterative improvements
- Deployed multiple experimental models and benchmarked performance to inform production decisions
- Collaborated with mentor to translate research goals into reliable engineering systems

Nest Friends | *Marketing & Data Analytics Intern*

Dec 2025 - Present

- Built Python analytics pipelines to analyze user behavior and campaign performance at scale
- Developed segmentation models to identify retention risks and growth opportunities
- Partnered with marketing and product teams to design data-driven experiments
- Translated insights into product and growth changes deployed to live users

Pantelope | *Software Intern*

Jun 2023 - Aug 2023

- Developed backend services in Java and frontend components in HTML/CSS for a production startup platform
- Implemented core application logic and data workflows supporting user-facing features
- Participated in sprint planning, code reviews, and feature design discussions
- Shipped production features under tight timelines while maintaining code quality

PROJECTS

ML-Powered Personal Health Insights App

- Built a scalable ingestion pipeline for iOS HealthKit data (heart rate, sleep, activity)
- Designed and deployed REST APIs using Flask to serve real-time user insights
- Processed and analyzed longitudinal time-series data to surface behavioral patterns
- Implemented interactive visualizations for user-facing health dashboards
- Architected the system to support future ML-driven recommendations

LEADERSHIP & EXTRACURRICULARS

Game Design Club | *President & Founder*

2023 - 2024

- Founded and led a club teaching peers how to design, build, and ship games from scratch
