EDUCATION

University of California San Diego

June 2027

B.S in Cognitive Science, Specialization in Human-Computer Interaction, Minor in Business Analytics

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, JavaScript, TypeScript, HTML/CSS, SASS/SCSS, Tailwind CSS

Technologies & Frameworks: React, Next.js, Bootstrap, Pandas, MongoDB, GSAP, Node.js, Firebase, Git/GitHub, Figma, Vercel, Netlify

EXPERIENCE

Lead Web Developer • UC San Diego Triton First

September 2024 - Present

- Built and launched the Triton First program website from the ground up, leading a cross-functional team of 5 to deliver a fully responsive platform serving 13,000+ first-generation students, faculty, and staff using HTML and CSS/SCSS.
- Led content planning and front-end design, improving user flow and ensuring timely, accurate updates for program events, workshops, and resources.

Software Developer & UI Designer • Data Science Student Society

September 2025 - Present

- Directed development of Chiba Lab website using React, TypeScript, Tailwind CSS, DaisyUI, and Figma, optimizing 15+ pages from prototypes to production.
- Increased homepage engagement by 75% and improved CI/CD pipelines for faster deployments.
- Collaborated with 10 developers to establish a scalable design system and deliver data-driven platforms for nonprofit clients.

Projects Chair • Triton XR

April 2025 - Present

- Led a cross-functional team to develop an immersive VR sensory system supporting autistic students, developing interactive prototypes in Unity using C#, UdonGraph, VRChat SDK to approach sensory regulation
- Implemented core interaction mechanics: sensory stimuli controls, trigger-based behaviors, and environment responsiveness
- Provided technical guidance to a 4 person team, managing workflows, debugging, and research documentation.

Computer Vision Researcher • Talmo Lab at the Salk Institute

June 2025 - August 2025

- Implemented a real-time 3D pose estimation pipeline, integrating video capture, model inference, calibration and rendering
- Automated workflows for frame preprocessing and data handling, improving reliability and debugging efficiency
- Delivered working prototype, providing good foundation for real-time 3D pose estimation development in SLEAP3D

VR Developer • Origami Air

March 2025 - June 2025

- Collaborated with a team of 4 to design and implement mechanics and interactive environments for an educational VR game exploring career paths using Unity and C#.
- Built and optimized core game mechanics in Unity and C#, including diagnosing patients, directing them to correct areas, and managing interactions.

PROJECTS

EMDR-Backyard • First Place Winner, HackXR | Unity, Blender, C#, Git

- Designed and developed a VR environment inspired by EMDR therapy, building a Japanese tea room setting and implementing bilateral-stimulation mechanics to support stress reduction and emotional regulation.
- Led a team of 3 to concept, prototype, and publish the experience within 48 hours for a hackathon submission.
