EDUCATION

Welham Girls' School, Dehradun, India

- Council for Indian School Certificate Examinations (CISCE): Grade 12.

2018- 2025

University of California San Diego

- BSc Data Science

2025- 2029

EXPERIENCE AS AN INTERN

Embark ICT Internship, Welham Girls' School, Dehradun

2023-2025

- Completed an internship with the school's ICT department from May 2023 to March 2025.
- Participated in the "EMBARC" initiative aimed at enhancing practical knowledge and problem-solving skills.
- Demonstrated commendable technical proficiency and adaptability in managing a range of ICT tasks, including networking, hardware installations, software installations, network security, and routine troubleshooting.
- Consistently enhanced skills and embraced new challenges, making significant contributions to the ICT Department and earning recognition for hard work and commitment.

Shivalik Bank Intern under Data Science Department, Saharanpur

2024

- Acquired comprehensive insights into various aspects of bank operations, with a focus on Management Information Systems (MIS) and data analytics.
- Researched and analyzed data analytics processes employed by different banks across the country, contributing to a broader understanding of industry standards and practices.
- Recognized for a strong work ethic, sincerity, and dedication throughout the internship.
- Exhibited a proactive approach and a willingness to learn and adapt, contributing effectively to the tasks and projects assigned.
- Enhanced skills related to enterprise and personal growth, aligning with the dynamic nature of the banking industry.

JOB SIMULATION

Goldman Sachs Risk Job Simulation on Forage - August 2025

- Completed a job simulation involving risk assessment and management for Goldman Sachs' Risk team.
- Conducted individual credit risk analysis using quantified financial data, enhancing skills in personal finance evaluation.
- Applied critical thinking and quantitative analysis to real estate scenarios, interpreting data to assess financial implications.
- Developed and recommended risk mitigation strategies, demonstrating practical application of financial principles and market understanding.

PROJECT LITRE OF LIGHT- AN INITIATIVE AIMING TOWARDS ILLUMINATING INDIA RENEWABLY

- Project Litre of Light is a grassroots movement led by me in my school, started as an initiative to provide affordable, sustainable lighting solutions to underprivileged communities lacking access to electricity. The initiative was inspired by a simple yet innovative idea: transforming plastic bottles into solar-powered light bulbs.

- The project utilizes readily available materials, primarily plastic bottles, and solar panels to create a solar-powered light source, a powerful compact lantern.
- The materials used are low-cost and readily available, making this a cost-effective solution for communities with limited resources. The cost of one bulb rounds off to a total of ₹ 150.
- We aim to provide solar-powered light bulbs to underdeveloped areas near Dehradun which lack easy access to electricity. We were successful and graced enough to be able to light up the world of many families in Thakurpur district of Dehradun and we aim to continue the good work.

COMMUNITY SERVICE

GoFundin - "LET'S HELP BEING THE RESPONSIBLE YOUNG ONES" (2021-22)

- With the determination to raise funds to support the fight against the second wave of COVID-19, my batchmates and I raised 4 lakh INR with this initiative.
- We inaugurated a COVID Testing Complex outside the Government Hospital, CHC Badkhalsa. Funded by Gofundin and initiated by Dr. J.S. Punia, Chief Medical Officer, Sonipat.
- Donated medicines to underprivileged COVID patients, a water cooler outside the hospital to provide accessible drinking water and wheelchairs to RC Memorial Hospital, Kanpur.
- Our efforts were commended by Dr. J.S. Punia for innovative and outstanding work at a young age and were awarded certificates and promised a District Award from the Deputy Commissioner, Sonipat.
- Most importantly, I gained experience in planning, funding, and executing community health projects which helped me demonstrate my ability to create and implement unique solutions in such alarming situations.

DISHA SOCIAL ORGANIZATION (2022-now)

- Disha, established in 1984, aims to mobilize women, the poor, marginalized, and vulnerable sections of society into sustainable groups for achieving social, economic, and political empowerment.
- I have been a part of Disha for the past three years, showing my unbridled desire to uplift the weaker section of society including women and children.
- I have persuaded over 250 illiterate women in Chilkana village, Saharanpur district, to join Disha.
- I have led various workshops and training sessions for volunteers to impart knowledge about beneficial schemes and taken initiatives to educate and mobilize communities.
- I also took lessons in digital literacy for rural girls aged 6 to 14 years and taught science to underprivileged children for the Junior Science Program.

LEADERSHIP ROLES

School Campus And Event Management Official (2024-25)

- As a School Campus and Event Management Official, the primary responsibilities encompass the effective maintenance and supervision of the school's physical environment as well as the organization and execution of various school events.
- In terms of event management, the responsibilities include planning, coordinating, and overseeing a wide range of school events, from sports meets and cultural festivals to parent-teacher meetings and other ceremonies.
- I also help address and resolve any issues that arise promptly, ensuring smooth operations and successful event execution.
- Overall, the role is crucial in creating a safe, efficient, and vibrant school community through meticulous campus management and dynamic event planning.

Editorial Board of Tech Key Magazine (2024-2025)

- As a member of the editorial board of TechKey Magazine, the premier tech-focused publication at my school, I have been responsible for overseeing the entire publication process, from content creation to final distribution.
- My role involves curating, editing, and proofreading articles to ensure high-quality and engaging content that aligns with the magazine's vision and standards.
- I plan and brainstorm ideas for upcoming issues, and manage deadlines to ensure timely publication.
- Overall, working in this Magazine provides a comprehensive skill set and experience that can significantly enhance your readiness for diverse career paths and academic pursuits.

Student Developer – Banking Software Project(2021)

- Collaborated with teacher mentor Amit Mahajan to design and implement a banking software system using Visual Basic.
- Developed core modules for account creation, transactions, and balance management, improving understanding of software development lifecycle.
- Gained early exposure to problem-solving, debugging, and real-world applications of programming concepts.
- Programmed features for:
 1. Weekly tuck/food allowances with spending limits.
 2. Fine deductions for school-related penalties.
 3. Final account balance calculations at the end of each term.
 4. Transaction tracking and withdrawals for student expenses.

RESEARCH PAPER

Educational programs and their dual impact on employability and long-term well-being

<https://www.mathematicaljournal.com/archives/2024.v5.i1.A.111>

- Published the research paper in the Journal of Mathematical Problems, Equations and Statistics.
- I conducted research in Adampur, Saharanpur, focusing on local educational backgrounds and their effect on career opportunities.
- Investigated the correlation between education levels and employment outcomes using Pearson's correlation coefficient. Analyzed the impact of education on qualitative virtues such as satisfaction and happiness through chi-square tests.
- I identified how education influences job prospects, career satisfaction, and overall happiness.
- This provided insights into the broader benefits of education beyond immediate employment outcomes.

CERTIFICATION AND COURSES

Computational Thinking for Problem Solving – University of Pennsylvania (Coursera) (2025)

- Learned to break down complex problems into smaller computational steps using algorithms, logic, and abstraction.
- Gained hands-on practice with Python programming basics, problem decomposition, and iterative design.
- Applied computational methods to real-world contexts, reinforcing skills essential for Data Science and software development.
- Strengthened ability to translate problems from diverse domains into computational solutions.
