EDUCATION

University of California San Diego

B.S. in Data Science (Machine Learning); Minors: Mathematics, Economics

GPA: 3.8

- Relevant Coursework: Probability+ Statistics, Econometrics, Differential Equations, Applied Linear Algebra, Data Structures, Computational Problem Solving, Theoretical Foundations of Data Science, Data Science in Industry

SKILLS

Programming Languages: Python(NumPy, Pandas, Matplotlib, Scikit-learn, SciPy, yfinance, PyMongo, Langchain, MongoDB, React, Node.js, Express.js, MQTT, RESTful APIs), Java, R, SQL, JavaScript/TypeScript, LaTeX

Machine Learning: Scikit-learn, Feature Engineering, Model Calibration, Algorithm Optimization, Algorithm Design, Data Structures, Statistical Modeling, Time Series Analysis, ETL Pipelines

Analytics Tools: Excel (Solver, PivotTables, VBA), Tableau, Jupyter Notebook, Git/GitHub

RELEVANT EXPERIENCE

Brain Corp | Lead Engineer, Technical Research Analyst

Sep 2025 – Dec 2025

- Designed and implemented a **low-latency, distributed multi-agent coordination system** using **MQTT(pub-sub)** to validate and optimize real-time robotics communication.
- Built a **real-time optimization framework** for multi-agent pathfinding, supporting **5+ concurrent agents** under dynamic constraints with **sub-3s route recalculation**. Achieved **100% collision avoidance** by integrating predictive trajectory modeling and moving-window stationary detection.
- Collaborated cross-functionally with **frontend engineers** to design visualization interfaces for real-time multi-agent simulations, enabling rapid validation and debugging of distributed system behavior.

San Diego County – Human Relations Commission (HRC) | Data & Policy Analyst

Sep 2025 – Dec 2025

- Evaluated bylaws, financial data, governance, and stakeholder frameworks from 15+ jurisdictions to assess equity outcomes and organizational design, producing **quantitative insights** and recommendations that informed the potential revival of San Diego's Human Relations Commission to enhance civic representation.

Lion Street LLC | Project Manager, Data Systems & Financial Products

Apr 2025 – Aug 2025

- Owned end-to-end **AI product development lifecycle** for an enterprise-facing insurance assistant, defining backend architecture, data pipelines, evaluation metrics, and deployment strategy.
- Developed and iterated on a **machine learning product-matching system**, training on **1M simulated customer profiles** across **11 features**; improved recommendation accuracy from **57% to 92%** via feature engineering and model calibration.
- Translated customer needs into model objectives and system constraints, aligning AI outputs with real-world investment and protection decision workflows.

Decipher Something | Consulting Analyst, Market Researcher

Apr 2025 – Jun 2025

- Led an 8-week **enterprise GenAI market research engagement**, identifying high-impact AI-assisted workflows for jargon-heavy professional documents in STEM and legal domains.
- Conducted competitive analysis and stakeholder interviews with **300+ enterprise prospects**, synthesizing insights into product positioning, roadmap priorities, and adoption risks for executive leadership.

PROJECTS

Student Foundation Investment Committee | Pandas, Matplotlib, Numpy, Mongo, Financial Data APIs

- Built an end-to-end **volatility analytics pipeline** aggregating financial APIs to compute implied vs. realized volatility, backtest signal efficacy, and support data-driven decision-making for a **\$1.5M endowment**.

TCG Automation Tracker | SQLite, Yagmail, HTML, NoDriver

- Built and deployed a **Python-based automation pipeline** to scale B2B outreach workflows, integrating data scraping, filtering, and email orchestration, improving internal operational efficiency by **85%**.

Recipe Analysis | Pandas, Plotly, GitHub Pages, Scikit-learn

- Built a **modular ML pipeline** processing **83K+ records**, implementing feature transformations, model selection, and hyperparameter tuning using scikit-learn.
- Maintained internship resource tracker, streamlining access to **200+ opportunities** each quarter.
