Education

University of California at San Diego

Major: Data Science

Relevant Coursework: Theoretical Foundations of Data Science, Programming and Data Structures for Data Science, Linear Algebra, Calculus I-III, Econometrics A

San Diego, California

Graduation Date: December 2027

Experience

Full-Stack Developer

San Diego, California

UCSD Data Science Student Society

October 2025 - December 2025

- **Developed** an interactive Stroop test simulator using Streamlit to **collect, process, and visualize cognitive response data**
- **Designed** a Python-based backend pipeline for participant performance data using PostgreSQL, ensuring reproducibility and scalability.
- **Enhanced** ecological validity by integrating voice input and reaction-time tracking features that use OpenAI's Whisper library
- **Published** a research paper leveraging **data cleaning, exploratory analysis, and statistical modeling** to identify key trends and derive actionable insights from the study

Junior Designer

San Diego, California

UCSD Design Lab

June 2025-Present

- **Selected** for UC San Diego's highly selective, two-year Junior Designer program, emphasizing real-world design practice, critique, and mentorship within the Design Lab
- **Trained** in human-centered design research, systems thinking, and end-to-end product execution, progressing from foundational methods to advanced, team-based projects
- **Collaborate** with multidisciplinary designers to translate user insights into tested concepts, high-fidelity interfaces, and implementation-ready solutions

Mindshifts On Megafires Design Challenge

San Diego, California

UCSD Design Lab

April 2025

- **Collaborated** in a multidisciplinary team during the UCSD MindShifts & Megafires Design Lab Challenge to address wildfire resilience through human-centered design
- **Conducted** expert interviews and user research to inform the design of *FireScan*, a proposed app-based solution that helps homeowners assess and improve wildfire preparedness
- **Recognized** with an Honorable Mention as a top 3 finalist among 10 teams for innovative and impactful design

Product Designer

San Diego, California

UCSD Cognitive Science Department

April 2025- June 2025

- **Conducted** user research through **interviews, surveys, and contextual observation** to identify student pain points around daily campus access
- **Translated** research insights into iterative low- to high-fidelity prototypes using **Figma and physical prototyping methods** to explore a **keyless campus access experience**
- **Collaborated** within a multidisciplinary team to design, refine, and present a **user-centered solution** at the **Visionaries Project Fair**

Awards and Projects

- **Provost Honors: Fall 2024 (3.9/4.0 GPA), Spring 2025 (3.5/4.0 GPA)**
- **Global Seal of Biliteracy:** Working Fluency Level in Spanish; Certified by AP College Board
- **Designed** and conducted a field study on whether students study more effectively alone or in groups, using observational coding, field notes, and surveys to collect and analyze behavioral data
