

Yi-Hsuan (Tony) Kuo

La Jolla | y3kuo@ucsd.edu | (310)803-0649 | <https://github.com/YihsuanKuo> | U.S. Permanent Resident

Education

University of California-San Diego , B.S. in Data Science	Sep 2023 – June 2027
• GPA: 3.95/4.00 • Coursework: Representation Learning, Data Structure and Algorithm for Data Science, Recommender System and Web Mining, Systems for Scalable Analysis, Theoretical Foundations of Data Science, Data Visualization, Data Management, Linear Algebra, Calculus, Mathematical Statistics, Discrete Math, Optimization for Data Science, NLP • Minor: Mathematics • Award: Seven times Provost Honor	

Skills

• Programming Languages: Python, SQL, Java, MATLAB, R • Toolkits: git, PyTorch, Numpy, Pandas, Sklearn, Pydicom	• Web Development: HTML, CSS, JavaScript • Languages: English, Chinese
---	--

Experience

Heron Neutron Medical Corp Software Engineering Intern	Hsinchu, Taiwan Jul. 2025 - Aug. 2025
• Optimized an oral mucosa auto-segmenting algorithm for BNCT treatment in DICOM images with 80% contouring accuracy. • Developed a deep learning model to segment head and neck organs on DICOM images for radiotherapy applications.	
Halicioğlu Data Science Institute at UCSD (HDSI) Tutor (Undergraduate TA)	La Jolla, CA Mar 2025 – Jun. 2025
• Class tutoring: DSC30 - Data Structure and Algorithm for Data Science • Supported a 250-student course through office hours, Q&A, and content clarification. • Raise the class average grade from B- to B+ compare to the previous quarter, which is the highest grade in the course history.	
Ever Fortune AI Machine Learning Intern	Taichung, Taiwan Aug 2024 – Sep 2024
• Helped develop a clinical AI tool to assist doctors with organ delineation for radiotherapy planning. • Improve the model's accuracy from 50% to 90% by conducted error analysis to identify and fix key issues in the training dataset.	

Projects & Start-Up

Habitual - The Next Generation Life Changer	Sep 2025 - Current
• Developing a new type of habit tracker app which use peer benchmarking and gamification approach • Status: Internal testing • Tools Used: Python, node.js, TypeScript, git, Dockerfile, MongoDB	
"Blockography" - Minecraft Biomes Classifier	Nov 2025
• Build a random forest classier with more than 85% accuracy that uses Minecraft's in-game image to classify its Minecraft biome. • Result: Top 10 candidate in the competition. • Tools Used: Python, Pandas, Sklearn, Numpy	
Data Hack - The NBA Akinator	Apr 2025
• Build a mind reading game using decision-tree-like logic to guess the NBA player the user is thinking about with 100% accuracy. • Tools Used: Python, web-scrapping, Next.js	

Club & Extracurricular

United Taiwanese Association of UCSD (UTA) President	La Jolla, CA June 2025 – Present
• Led a 14-member board to oversee operations, events, and safety for a student organization with 1000+ followers. • Directed weekly meetings, maintained organized resources, and refined the UTA Constitution to guide long-term growth.	
Treasurer	July 2024 – June 2025
• Managed UTA's assets and processed reimbursements to ensure accurate and efficient financial operations. • Secured on- and off-campus funding sources, contributing to a 25% increase in total savings.
