

SUMMARY

Data Analyst with 3 years of experience using SQL, Tableau, and Python to automate workflows, build dashboards, and uncover insights. Skilled in transforming complex data into actionable strategies to improve efficiency and support business decisions. Committed to continuous learning and innovation to enhance business performance.

WORK EXPERIENCE

System Engineer | **Mar 2022 – Nov 2024**

Data Analysis Project (Account: TSB) **May 2023 – Nov 2024**

- Extracted, cleaned, and validated large volumes of loan application and payment data from the Data Warehouse using advanced SQL techniques to ensure accuracy and consistency.
- Identified missed monthly payments through optimized SQL queries and CTEs, improving query efficiency and enabling faster data retrieval.
- Built and maintained ETL pipelines to integrate data from multiple sources into Snowflake, enhancing data accessibility and supporting analytics initiatives.
- Automated monthly reporting processes, including payment detail table refreshes and recurring report generation, reducing manual workload and improving data availability.
- Developed interactive Tableau dashboards connected to MySQL, delivering real-time insights for business decision-making and monthly reporting

Data Migration Project (Account: RBS) **April 2022– May 2023**

- Centralized data from multiple sources into a unified Data Mart using ETL processes in Snowflake and Teradata, enabling faster and more accurate regulatory reporting.
- Automated data collection from legacy banking systems, reducing manual effort and minimizing errors using SQL.
- Reduced system analysis time from 3 weeks to 1.5 weeks by optimizing workflows in collaboration with Business Operations and Data Mart teams.
- Created Tableau dashboards to track data migration progress, ensure accuracy, and provide real-time insights for leadership decision-making.

TECHNICAL SKILLS

- **Data Analysis & Visualization Tools** – Tableau, Excel
- **Database & Programming** – ETL, Snowflake, Teradata, MySQL, Python
- **Project Management Tools** – JIRA, GitHub

CERTIFICATIONS

- [Tableau Desktop Specialist](#)
- Infosys Certified Python Developer
- SQL

PROJECTS

Netflix Movies & TV Shows Dashboard – Tableau [Link](#)

- Designed an interactive Tableau dashboard to analyze Netflix's movie and TV show dataset.
- Imported and cleaned data in Tableau, created bar charts, maps, pie charts, and line graphs, and added dynamic filters for interactive analysis.
- Used Tableau to analyze content types, top genres, country-wise distribution, rating trends, and yearly content growth, showcasing expertise in data visualization and analytics.

British Airways Review - Tableau [Link](#)

- Designed and published an interactive Tableau dashboard on Tableau Public to analyze British Airways reviews, summarizing key metrics like average rating, cabin staff service, entertainment, and overall value for money.
- Developed various visualizations, including trend lines, bar charts, and geographic maps, while integrating dynamic filters for an interactive and insightful user experience.

EDUCATION

Bachelors in Mechanical Engineering – Anna University

July '16 – May '20
