The City College of New York May 2026
B.S. Computer Science

- ## SKILLS

- ## EXPERIENCE

Data Engineer Intern *New York, NY*

- Built Python pipelines to ingest, enrich, and standardize publicist contact data, supporting outreach and editorial operations
- Refactored 5+ years of content performance logs into structured datasets, enabling exploratory and predictive analysis
- Processed and modeled operational feedback data to analyze equipment usage patterns, informing intern resource planning

Airline Analytics Lakehouse | PySpark, Databricks, Delta Lake, AWS

- BMW Market Pulse |
- Airflow, Docker, Snowflake, dbt*

- NYC Traffic Collision Severity Prediction | Python, pandas, scikit-learn

- MTA Ridership Analysis | Python, BI

- Cleaned and summarized **107,974** rows of ridership data to produce time-series and payment-method analysis tables
- Built dashboards over **2.17M** ride entries analyzing fare-type distribution and MetroCard (**60%**) vs OMNY (**40%**) usage
