TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, Java, Bash, HTML/CSS

Databases: Postgres, MySQL, MongoDB, Redis, Firebase, NoSQL

Frameworks & Tools: Django, FastAPI, React, Angular, Next.js, Node.js, Docker, Git, AWS, Azure, Kubernetes, Kafka, Prometheus, Grafana, Jenkins, Postman, Swagger

EXPERIENCE

• Zappd

Oct 2025 – Jan 2026

Founding Engineer

Canton, MI

- Architected a multi-tenant **FastAPI** backend with **PostgreSQL** and **Redis**, automating SMS orders and reducing manual entry time by 70% via an **Amazon Lightsail/Nginx** deployment.
- Integrated **LangChain** and **OpenAI** for intent recognition, achieving 95% accuracy in interpreting complex customer modifications and dietary restrictions.
- Implemented enterprise security (**OAuth2**, **AES-256**) in collaboration with an IBM Director to ensure data integrity.

• SSA Soft

Mar 2025 – Jul 2025

Software Engineer Intern

Northville, MI

- Developed **GraphQL** resolvers and optimized **React (TS)** components (memoization, code-splitting), reducing load times 6x and saving 2+ hours/day for 100+ logistics users.
- Deployed **Prometheus/Grafana** on **Kubernetes** with custom .NET metrics, reducing MTTR by 35%.
- Automated regression testing using **Jenkins** and **Azure DevOps**, cutting deployment cycles by 20%.

• DWP Technologies

May 2024 – Feb 2025

Backend Engineer

Lahore, Pakistan

- Built a **Django/Celery** ETL pipeline to transform months of unstructured Borjomi sales data in Excel sheets, improving processing efficiency by 80%.
- Optimized SQL queries and implemented **Redis/Materialized Views**, cutting dashboard response times from 15s to <1s.

• Odo Ai

Feb 2023 – Apr 2024

Software Engineer

Lahore, Pakistan

- Spearheaded development of a mobile commerce marketplace using **Angular** and **Node.js**, scaling to 2K+ monthly active users within the first 6 months.
- Improved SEO performance and UI responsiveness, leading to a 40% improvement in Core Web Vitals and a 35% boost in organic user acquisition.

PROJECTS

• AI Voice Agents for Local Businesses

Python, FastAPI, Twilio, OpenAI Realtime, React

- Engineered real-time voice agents using **OpenAI Realtime API** and **Twilio**, achieving <1.5s latency for automated inbound booking and customer support.
- Built a **WebSocket-based** analytics dashboard to monitor call sentiment and conversion rates in real-time.

• Pain Point Discovery Search Engine

Next.js, Reddit API, OpenAI, Node.js

- Engineered a data ingestion pipeline using the **Reddit API** to harvest and analyze thousands of community discussions, identifying emerging SaaS market gaps.
- Leveraged **OpenAI** to perform sentiment analysis and thematic summarization, transforming unstructured social data into categorized, actionable "pain points."

• RAG-based Financial Analysis Assistant

LangChain, FastAPI, pgvector, Banking API

- Integrated banking APIs to ingest daily transaction history, utilizing **pgvector** to store and query high-dimensional embeddings for semantic search and habit analysis.
- Developed a **LangChain-powered** RAG pipeline to analyze spending patterns via natural language queries, providing personalized financial insights and summaries.
