

EDUCATION		
University		Aug 2023 – May 2025
Master of Science in Data Analytics		City, State
• Coursework: Mathematical Methods for Data Analytics, Big Data, Deep Learning		
University		Jul 2018 – May 2022
Bachelor of Technology in Information Technology		City, State
• Coursework: Database Systems, Data Visualization, Data Mining Technologies, Machine Learning		

TECHNICAL SKILLS

Languages: Python, R, SQL, Java, C, C++, JavaScript, HTML, CSS, Perl
Tools & Platforms: Power BI, Tableau, Excel, Spark, Hadoop, BigQuery, Snowflake, GCP, AWS, Docker, Kubernetes, Git, JIRA, MS PowerPoint, TrackWise, MongoDB, Postman
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-Learn, TensorFlow, Keras, PyTorch, PySpark, StatsModels, React.js, Node.js, Express.js, AngularJS
Machine Learning & AI: Neural Networks, Retrieval-Augmented Generation (RAG), Natural Language Processing, Pareto Analysis, Sentiment Analysis, Time Series Forecasting, A/B Testing, Statistical Inference

WORK EXPERIENCE

Business Analyst	Oct 2025 – Present
Company	City, State
• Developed a trend analysis system by defining around 15 cross-entity metrics to track beneficiary, volunteer, and donor activity, integrating Google Analytics with Snowflake-based data pipelines, and building Python-driven workflows to produce geographic and KPI dashboards for platform-wide insights.	
• Built a scalable cloud-native AWS ETL system using Lambda, S3, AWS Glue, and OpenSearch to ingest, clean, and transform external organizational datasets, applying entity resolution via EIN-based joins and automated categorization into 6 domain-specific classes , enabling downstream ML-driven search, retrieval, and inference workflows.	
• Deployed an LLM-driven NER and Translation framework that automatically identified key entities and delivered multilingual responses to user queries, reducing manual triage time by 60% and improving response relevance across global support channels .	
Business Intelligence Analyst	Aug 2022 – Jul 2023
Company	City, State
• Designed 20 Power BI dashboards to track sales and operational metrics, enabling the organization to undertake decisions that improved KPIs by an average of 18% .	
• Diagnosed sales inefficiencies by analyzing KPIs using Pandas and SQL, leading to a 27% reduction in expenditures .	
• Automated cross-departmental reporting workflows with Power BI, decreasing manual effort by over 40% and slashing average report turnaround time from 3 days to under 1.5 days .	
• Deployed propensity and churn models to score real estate leads and existing clients, increasing lead-to-sale conversion by 15% and reducing marketing spend per acquisition by 12% .	
Software Engineering Intern	Jan 2022 – Jul 2022
Company	City, State
• Developed a web application with Next.js and TypeScript , improving task completion by 14+ hours per sprint .	
• Built a responsive React UI optimized for performance, achieving <200 ms average API response time and consistent cross-device user experience.	
• Implemented unit tests with 79% coverage using Jest to improve functionality across the application.	

PROJECTS

Persona-Grounded RAG System Prompt Engineering, LLMs, GenAI	Sep 2024 – May 2025
• Engineered a multi-personality chatbot by fine-tuning and evaluating TinyLlama-1.1B with RAG .	
• Applied LoRA with 4-bit quantization and checkpointing to train on instruction-style prompts for persona-aligned replies.	
• Quantified fine-tuned RAG model's performance, attaining 85% of GPT-4o's accuracy in human evaluations while also decreasing inference cost by 40% and doubling response speed .	
Full-Stack Notes Application (MERN Stack) MongoDB, Express, React, Node.js	Aug 2024 – Nov 2024
• Developed a production-ready MERN notes application with CRUD functionality, supporting 1,000+ API requests/day through a scalable RESTful architecture.	
• Implemented rate limiting and backend validation , reducing malformed requests by 40%+ and improving API reliability.
