EXPERIENCE

Help Desk Specialist 2
MassMutual

July 2024 - Present
Springfield, MA

- Escalated complex issues to Level 3 teams using tools like xMatters, improving resolution efficiency and maintaining SLA compliance.
- Provided technical support for identity verification and remote access tools, including Okta Verify, GlobalProtect, and Cisco AnyConnect, enhancing user productivity and security.
- Performed remote troubleshooting using SCCM, JAMF, Quick Assist, and Zoom, resolving technical issues efficiently and enhancing user satisfaction..
- Streamlined ticket escalation process using xMatters, reducing Level 3 response time by notifying proper support teams.
- Collaborated with a developer to conduct comprehensive testing and validation of a website, identifying and resolving bugs and resolving functionality of the site.

Service Desk Agent
GalaxE.Solutions

November 2023 - January 2024
Springfield, MA

- Exceeded targets in Service Desk agent training program, resulting in on-boarding at the 25-day mark instead of standard 90 days for new agent on-boarding.
- Provided Tier/Level 1 End User Services ("EUS") help desk expertise to Small Medium Businesses ("SMB") Client base including password resets, power cycling of intermediary devices such as routers/switches/firewalls, in an ITIL-aligned service desk operational format on Jira
- Participated in Change Advisory Board ("CAB") meetings, coordinated and facilitated service desk lifecycle: Incident (ticket), Problem, Change, including post-review and knowledge capture and documentation
- Developed PowerShell scripting to optimize day-to-day Active Directory operations in a Windows Server and Microsoft Azure environment.

PROJECTS

Flight Planner | Python,REST API,

Flight-Planner

- Implemented a Graphical User Interface (GUI) using Python's tkinter library , allowing users to input their departure and destination airports
- Seamlessly integrated an airline API sourced from the Department of Transportation to access real-time flight information, encompassing flight schedules, availability, and pricing.
- Added a random flights button that generates a selection of random flight options for users who prefer an element of surprise in their travel plans.
- Implemented functionality to display the cheapest flight option among the available choices using the matplotlib library, helping users make cost-effective decisions.

Personal Portfolio | HTML,CSS,JavaScript,Bootstrap,

Personal Portfolio

- Implemented JavaScript-based animations and dynamic data fetching for seamless navigation and enhanced usability
- Provided a convenient and user-friendly way for visitors to submit feedback using a Google Form
- Created a visually appealing, user-friendly interface resulting in positive feedback from peers and industry professionals
- Deployed the website using GitHub, enabling seamless accessibility for potential employers.
