

STUDENT NAME

Greater Los Angeles Area | (XXX)-XXX-XXXX | student@email.com | linkedin.com/in/yourprofile

Education

Public High School

Expected 2026

GPA: High (Unweighted) | SAT: 1500+

Southern California

- **AIME Qualifier** | Qualified through AMC performance (recent year)
- **USACO Gold Division** | Competitive programming in C++ / Python (recent year)
- **National Biology Olympiad Recognition** | Earned national-level distinction (top percentile)
- **CAD Certification** | Industry-recognized certification in mechanical design / assemblies

Local Community College (Dual Enrollment)

2024 – 2025

GPA: 4.0

Los Angeles Area

- **Relevant Coursework:** Multivariable Calculus, Linear Algebra, Calculus Sequence

Experience

EdTech Startup (College Application Platform)

2024 – Present

Founding Team Member / Operations Lead

Remote

- Owned product development for student-facing tools (test prep + application-building features) to improve user outcomes.
- Built web tools using React and Firebase; scaled platform to **hundreds of thousands of registered users**.
- Designed internal linking + SEO structure to drive sustained month-over-month traffic growth.

Selective Summer Research Program (University Lab)

Summer 2025

Research Intern

Northeast U.S.

- Ran microbial evolution experiments and wrote **Python analysis scripts** to process genomic data and identify mutation patterns linked to antibiotic resistance.

Hardware / Engineering Startup

2024 – 2025

Product Design Engineering Intern (CAD + UI/UX)

Los Angeles Area

- Improved website **UI/UX** by restructuring landing pages and simplifying user flows to support B2B conversion.
- Designed manufacturing-ready mechanical components in **SolidWorks CAD** for rooftop hardware systems.

Engineering Projects

Student Solar Vehicle Team

2023 – Present

Team Captain & Electrical Lead | [portfolio link](#)

Southern California

- Led a 20+ person team building a solar vehicle; earned **top national placement** in a major student competition (recent years).
- Built an **IoT telemetry system** (microcontroller-based) to monitor solar input, battery voltage, and motor performance.
- Designed and iterated PCB layouts for power distribution to reduce electrical complexity and improve reliability.

Competitive Leadership

National Science Bowl

2022 – Present

Varsity Co-Captain (Math & Biology)

High School Team

- Served as math/biology specialist; helped lead team to a **top regional finish** through fast buzzer work and targeted review.

Science Olympiad

2024 – Present

Co-Captain & Varsity Competitor

High School Team

- Led team to strong regional results; earned multiple medals including top placements at competitive invitationals.

Skills & Interests

Languages/Tools: Python, Java, C++, React, Node.js, Firebase, Microcontrollers/IoT, SolidWorks CAD

Interests: Sports, cooking/baking, strategy games, cycling/outdoors, music
