

EXPERIENCE

Discovery Partner Institute

Chicago, IL

Data Analyst - Intern,

May 2024 - June 2024

- Cleaned and visualized fashion-trend datasets using Python (Pandas, Google Colab).
- Ran statistical comparisons between youth (≤ 18) and adult (30+) consumer groups

Foundation in CS - Intern,

May 2023 - June 2023

- Completed Java fundamentals coursework.
- Participated in tech workshops by Google and 1871, gaining applied industry exposure

Code Nation

Chicago, IL

Web Developer Fellow

2022-2023

- Built and deployed web projects using HTML, CSS, and JavaScript while collaborating in teams and completing structured programming challenges in a corporate-led program.

Alden Estate of Evanston

Evanston, IL

Receptionist

April 2025- Present

- Coordinated admissions and maintained accurate records while streamlining cross-team workflows by identifying process gaps and implementing fixes.

PROJECTS

Cybersecurity Lab Tools (TryHackMe Advent of Cyber 2025- Python, Linux, Bash)

- Learning Linux fundamentals and core Bash commands for file navigation and manipulation, while practicing phishing-simulation and basic defensive techniques through the Advent of Cyber 2025 labs.

Data Science Fashion Trend Analysis (Python, Data Visualization)

- Built a data-cleaning and visualization pipeline for open datasets, using statistical comparisons and charts to clearly highlight trends.

Diseased Plant Identifier

Neural Network- Python, Pytorch, Jupyter/Colab, NumPy, ResNet, Github

- Built and trained PyTorch computer-vision models to classify diseased crops, progressing from binary to multi-class classification, while collaborating on a 7-person team using GitHub for version control and iterative model evaluation.

SKILLS

Technical: Python, JavaScript, HTML/CSS; data analysis, visualization; Linux(intermediate), networking fundamentals(TryHackMe); Collaboration, problem-solving, adaptability
