

EDUCATION

University of Colorado Boulder , Boulder, CO	Boulder, CO
<i>Master Of Science In Computer Science(GPA 4.0)</i>	Sep. 2024 - Dec 2026
Bentley University , Waltham, MA	Waltham, MA
<i>Bachelor of Science, Major in Business Management</i>	Sep. 2019 - May 2023

WORK EXPERIENCE

AI Fellow(Model Validation Expert)	October 2025 - Present
<i>Handshake AI</i>	[REDACTED]

- Validated generative image model outputs for consistency and prompt adherence across thousands of samples.
- Reviewed and tagged output failures in a structured dataset, providing feedback for targeted retraining.

AI Training Specialist	May 2025 - June 2025
<i>InnoData</i>	[REDACTED]

- Processed high-volume social media datasets for large language model training, filtering personally identifiable information (PII) to ensure compliance with privacy regulations.
- Enhanced PII detection accuracy to 98% and reducing false positives by 25% in **LLM training** datasets.
- Maintained rigorous quality standards with consistently exceeding **95% accuracy** targets on dataset validation metrics.

Area Manager Intern	May 2022 - July 2022
<i>Amazon</i>	[REDACTED]

- Implemented improvements that **reduced** operational costs by **\$200,000+ quarterly** through workflow optimization and business operations analysis.
- Analyzed operational data** to pinpoint bottlenecks and implemented process improvements reducing average order fulfillment time by 15%.
- Applied Lean Six Sigma methodologies to eliminate process waste, achieving **20% efficiency gain** in package sorting operations and reducing average processing time by 3 minutes per unit.

TECHNICAL PROJECTS

Market Sentiment Analysis:	April 2024 - June 2024
Real-time Examination of Financial News Dynamics in Equity Markets	

- Engineered an **end-to-end data pipeline** processing thousands of financial news articles via EODHD API.
- Deployed DistilRoBERTa sentiment analysis model on GPU for **batched inference** across thousands of articles, achieving **60% faster** processing compared to CPU-only implementation.
- Built interactive visualizations using Matplotlib overlaying adjusted close prices with sentiment signals, enabling correlation analysis between news sentiment and stock price movements.
- Conducted comprehensive back-testing correlating sentiment trends with equity price movements for 500+ target tickers.

Technologies: Python, PyTorch, TensorFlow, DirectML, Pandas, NumPy, Matplotlib

TECHNICAL SKILLS

Languages: Java, Python, SQL

Developer Tools: Git, GitHub, Linux, Docker, Google Cloud Platform, VS Code, Visual Studio, Pycharm, IntelliJ, Eclipse

Frameworks and Libraries: Pandas, Matplotlib, HuggingFace Transformers, PyTorch, TensorFlow, Natural Language Processing (NLP), DirectML
