EDUCATION

University of Somewhere

City, State

Bachelor of Science in Computer Science & Systems; Minor in Mathematics

Expected Graduation: June 2026

- Cumulative GPA: 3.82 — Dean's List 2023-2025

EXPERIENCE

Software Engineer Intern

June 2025 – September 2025

Fast Enterprises – XXXXXXXX

City, State

- Implemented a full stack public-facing search portal to serve thousands of individuals, businesses, and manufacturers across the state using C# and MySQL
- Consulted government employees and experienced software engineering teammates to ensure client satisfaction, a smooth transition from legacy systems, and adherence to company standards
- Integrated declarative programming, knowledge of databases, and user-centered development to produce dynamic and maintainable software

Course Facilitator

September 2025 – December 2025

University of Somewhere – School of Engineering & Technology

City, State

- Orchestrated biweekly workshops for the core Discrete Structures course to support student comprehension, professional development, and teamwork abilities
- Created challenging practice problems and worksheets to reinforce key concepts and facilitate active learning
- Led problem-solving sessions, provided step-by-step guidance and clarified students' queries regarding mathematical principles

Student Center Coordinator

September 2023 – Present

University of Somewhere – Center for Student Involvement

City, State

- Initiated and managed large-scale on-campus events, collaborating with coworkers and faculty to promote inclusivity and engagement amongst XXX student body members
- Developed interpersonal skills by aiding 30+ people per shift and helped them locate XXX resources on campus and online
- Aided XXX clubs through familiarization with club policies, operations, and resources

LEADERSHIP

Club President

April 2024 – Present

Women in Computer Science (WiCS) – University of Somewhere

City, State

- Coordinated with alumni, faculty, XXX clubs and departments to host educational and career-based opportunities for women and underrepresented minorities in computer science
- Collaborated with fellow WiCS officers to orchestrate and facilitate club meetings with 20+ attendees
- Organized career development panel dedicated to fostering connections among female engineering and technology students and field experts, serving as a catalyst for personal growth and professional development

PROJECTS

Dungeon Cat | C#, SQL, Unity

Front-End Game Developer

- Collaborated with a group of peers to produce a 2D dungeon crawler RPG in Unity
- Led front-end related work, providing features and feedback that enhanced user experience
- Applied MVC architecture, Agile methodologies, and OOP principles to support code maintainability and game-expansion

TECHNICAL SKILLS

Languages: Java, C#, SQL, Python, C, HTML/CSS, JavaScript/TypeScript

Frameworks/Libraries: .NET, Node.js, React.js

Developer Tools: Git/GitHub, VSCode, IntelliJ, Unity, Linux
