

EDUCATION

University of Waterloo <i>Bachelor of Applied Science in Computer Engineering</i> • GPA: 3.91/4.00 • Relevant Courses: Fundamentals of Programming (C++), Digital Logic & Circuits, Linear Algebra, Calculus I	Waterloo, ON <i>Expected 2029</i>
--	--------------------------------------

EXPERIENCE

Web Developer Electrum Inc. • Built Firebase password reset, reducing account lockout requests by 30% and improving reliability. • Developed Haversine-based proximity system querying 100+ outlets, delivering 10km alerts and reducing duplicate entries by 40%. • Repaired 2 critical map issues and added reusable layer management, achieving 100% heatmap visibility.	Sept. 2025 – Dec. 2025 University of Waterloo, ON
Full Stack Developer Electrum Inc. • Developed a Job Application Portal using React, Node.js/Express.js, and MongoDB, supporting 4,000+ candidate-recruiter interactions. • Built and integrated 4+ RESTful APIs powering core features including job posting, application tracking, user authentication, role-based access, resume uploads, hybrid interview scheduling, and timed technical tests. • Implemented a Customizable Online Assessment (OA) Creator for recruiters and an Admin Portal. • Improved frontend UX with React and Tailwind CSS, reducing load times by 30%.	May 2025 – Aug. 2025 University of Waterloo, ON
Junior Software Engineering Intern Electrum Inc. • Contributed to Python-MySQL projects, applying backend logic, database design, and UI integration. • Implemented an AES encryption feature for secure data transmission, ensuring end-to-end confidentiality. • Developed a Expense Tracker Application with persistent MySQL storage, featuring visualized financial trends through dynamic charts and tabular reports. • Collaborated in code reviews and testing, gaining exposure to Git-based version control and debugging.	July 2024 – Sept. 2024 University of Waterloo, ON

PROJECTS

Startup-in-a-Box (Hon. Mention, UW Claude Code Hackathon) Next.js, TypeScript, Claude API Oct. 2025 • Built full-stack AI app generating entire startup business plans in 15 seconds, reducing planning time by 99%. • Designed responsive landing page generator with 6+ dynamic sections, enabling users to preview & export production-ready marketing pages with custom branding. • Created interactive financial visualization generator displaying 12-month projections. • Produces dynamic 10-slide pitch deck generator with markdown rendering, enabling users to export investor-ready presentations in multiple formats.	
Python Library Management Software Python, MySQL • Built a command-line software to manage library operations, handling 1000+ books and 500+ members. • Automated book inventory, member records, book circulation, and fee calculation, reducing manual-record keeping at local library by 80%. • Implemented user authentication and database initialization, ensuring data security and system reusability. • Designed and executed SQL queries for CRUD operations with error handling and input validation.	Dec. 2024

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, PostgreSQL, MySQL, MongoDB
Frameworks: React, Next.js, Node.js, Express.js, FastAPI, TensorFlow, Tailwind CSS, Material-UI, SASS, HTML5
Libraries: NumPy, Pandas, OpenCV, Matplotlib, Scikit-learn
Developer Tools: Git, AWS, Firebase, Uvicorn, Github, Postman, MySQL Connector, VS Code
Concepts: Computer Vision, ML Inference, RESTful API Design, Database Design & Normalization
Practices & Standards: Agile development, Test-Driven Development (TDD), Quality Assurance principles
