

EDUCATION

University of Texas at Austin

Expected 2027

- Major: B.S. Computer Science - GPA 3.3/4.0
- Relevant Coursework: Data Structures, Discrete Math, Object-Oriented Programming, Competitive Programming, Computer Architecture, Linear Algebra, Computer OS, Algorithms and Complexity

PROFESSIONAL EXPERIENCE

May 2024 - Aug 2024

- Collaborated with early-stage founders to evaluate startup ideas, conduct market research, and validate business models.
- Assisted in developing go-to-market strategies, pitch decks, and financial projections for new ventures
- Participated in brainstorming sessions, mentorship workshops, and startup accelerators focused on innovation and entrepreneurship

Jun 2025 - Jul 2025

- Supported the Fusion 360 team by helping improve internal tooling for design validation workflows. Worked with a small team of engineers to streamline part of the process used to test CAD model compatibility across different modules of the software
- This project helped reduce manual testing time and improved the reliability of a key validation step in the development cycle. Used Python, Fusion 360 API, Git, Jira, internal Autodesk testing frameworks during my time there

PROJECTS

[Algorithm Visualizer \(Roblox\)](#)

September 2025

Tools: Lua, Roblox Studio

- Created an interactive pathfinder visualizer, implementing BFS, DFS, and Dijkstra's on a dynamic grid environment.
- Incorporated variable terrain costs (e.g., mud tiles) and measured path cost, length, and execution time to compare algorithm efficiency.

[Dynamic Memory Allocator](#)

September 2025

Tools: C, Linux, SSH Configuration

- Developed a custom memory block free-list in C.
- Developed tests for 16-byte block alignment and memory leak detection.
- Implemented threshold splitting and coalescing techniques for allocating/deallocating free blocks.

[Wordle Solver](#)

December 2025

Tools: Python, Pytorch, Javascript, Flask

- Developed ML-based Wordle solvers using MLP and LSTM models trained on large-scale simulated games.
- Designed and implemented a Flask REST API to serve predictions for real-time inference.
- Built a browser extension that consumes backend APIs to deliver live suggestions to users.
- Structured gameplay logs into datasets for model training and evaluation.

TECHNICAL SKILLS & INTERESTS

- **Languages:** Java, Python, JavaScript, TypeScript, SQL, HTML, CSS, C++, R, Lua
- **Frameworks:** Spring Boot, React.js, Next.js, Node.js, PostgreSQL, Vue.js, Flask, React Native, TailwindCSS
- **Developer Tools:** AWS, Postman, Git, Docker, Prism, Supabase, Render, Firebase
- **Interests:** Gaming, Climbing, Tennis, Reading

EXTRACURRICULARS

[Esports Team Manager \(Marvel Rivals\)](#) | Ranked: Top 128 x3, Top 64 x1, Top 16 x1

Dec. 2024 - Aug 2025

- Built competitive teams from scratch, organized training and scrim schedules, and coordinated events and tournaments with external teams.
- Managed a **team of 8+**, providing up-to-date communication between team members, maintaining a healthy, competitive atmosphere for cohesive team play.

[Esports Coach](#)

Jan. 2025 - Present

- Coach **20+ players** via Discord and Fiverr contracts, improving strategy, mechanics, and teamwork.
- Tracked hours of player performance through live gameplay and VOD analysis to provide actionable tips and improve in-game strategy.
