

Praveen Sharma

p4sharma@ucsd.edu | +1 (858) 729-4474 | www.linkedin.com/in/praveendesharma | San Diego, CA

EDUCATION

University of California, San Diego

La Jolla, CA

B.S. Data Science | B.S. Applied Mathematics | Cognitive Science Minor

(Expected) June 2027

- **Cumulative GPA: 3.97/4.00**, Provost Honors (x5), Eta Kappa Nu (Top 20%)

Coursework: Data Structures and Algorithms, Advanced Linear Algebra, Statistical Methods, Intro to Data Visualization

RESEARCH & EXPERIENCE

Data Science Student Society

La Jolla, CA

Sponsorship Chair

May 2024 - Present

- **Co-led external relations efforts** with the VP External, building strong partnerships with industry leaders such as **IBM, Palantir, and ASML** through strategic outreach and attending professional networking events.
- **Organized ~15 industry-facing events**, including networking sessions and technical panels, to strengthen connections with new partners and lay the foundation for future collaborations.

Team External Member

October 2023 - May 2024

- Supported outreach strategy and relationship management with industry partners, **playing a key role** in organizing a successful event with **ASML** that helped establish a lasting partnership.
- Assisted in outreach communications and coordinating logistics for technical and sponsor-facing events, helping streamline engagement with external collaborators.

Halicioğlu Data Science Institute, UC San Diego

La Jolla, CA

Instructional Assistant

January 2025 - Present

- Held weekly office hours to assist **~510 students** with programming in **Python** and coursework, covering key computational topics such as **recursion, object-oriented programming, and data structures**.
- Provided individualized feedback during one-on-one reviews, aiding with conceptual understanding and debugging.

Undergraduate-Graduate Research Lab, UC San Diego

La Jolla, CA

Research Assistant

April 2024 – November 2024

- Conducted a comprehensive literature review on multiproduction networks and trade credit, **analyzing over 10 research papers** to gain insight on firm-to-firm financial and production linkages.
- Supported the development of a static model using Python with **over 100,000 transaction records** from Chilean firms.

PROJECTS

[Power Outages Analysis](#)

Data Science/Machine Learning Project

- **Improved model accuracy by 16%** (from 5153.60 to 4294.76 RMSE) by applying **GradientBoostingRegressor** to a dataset of **1,500+ power outages**, enhancing outage duration predictions for emergency response planning.
- **Developed and optimized** a prediction pipeline through **feature engineering** and **hyperparameter tuning**, reducing overfitting and increasing forecasting reliability for power outage duration predictions.

[N-Gram Language Model Optimization](#)

Machine Learning/Natural Language Processing (NLP)

- **Improved sentence coherence by 35%** by building an **N-Gram language model** for text generation, implementing tokenization, n-gram probability estimation, and sampling.
- **Reduced model perplexity by 25%** through the development of an efficient text generation pipeline that improved and optimized n-gram computation.

SKILLS

Programming: Python (Pandas, Scikit-Learn, TensorFlow), Java, SQL, JavaScript, Object-Oriented Programming

Soft Skills: Communication, Leadership, Collaboration, Detail Oriented, Critical Thinking
