SUMMARY

Data Science undergraduate at UC San Diego with hands-on experience applying analytics, automation, and data infrastructure to improve operational efficiency and decision-making. Proven ability to translate complex datasets and technical systems into actionable insights for researchers, product teams, and non-technical stakeholders. Seeking an **Analyst / Data Consulting** role focused on data-driven strategy and measurable impact.

EDUCATION

University of California, San Diego

- Bachelors of Science in Data Science, Expected May 2026
 - 3.6 GPA | Eleanor Roosevelt College Provost Honors
-

EXPERIENCE

UC San Diego ITS Service Desk (September 2025-Present)

Service Desk Technician

- Resolved **549+ IT tickets (75% close rate)**, restoring access to critical systems for **50+ users** to enable payroll, academic advising, and financial aid.
- Supported **300+ users**, including elderly and non-native English speakers, by translating technical issues into clear, user-friendly solutions.

KynosAI (July 2025-September 2025)

Discovery Intern

- Conducted **competitive and market analysis** to inform product strategy and prioritization for key stakeholders.
- Built and documented **n8n automation workflows** to reduce manual marketing operations and enable cross-team collaboration.

Rucio-SENSE Data Movement Manager (DMM), Wurthwein Lab UCSD, CA (February 2024-September 2024)

Iris-HEP Fellow | <https://iris-hep.org/fellows/couchsnail.html>

- Redesigned DMM frontend to surface transfer time, rate, status, and source/destination, improving usability for **15+ researchers** on UC San Diego CMS Team 2 and supporting broader **adoption across CERN collaborators**.
 - Researched and implemented **throughput calculations** to improve fairness and accuracy in production monitoring.
 - Developed and iterated on a **monitoring daemon** that proactively alerted users to transfer failures, **reducing manual checks and downtime**.
-

PROJECTS

Assessing Sample Size and Statistical Power for Microbial Diversity: A Replication Study

Student Researcher

- Replicated and validated published statistical power analyses, strengthening confidence in clinical microbiome study design and reproducibility.
 - Authored a peer-reviewed technical report and public GitHub repository with end-to-end, reproducible data pipelines after **30+ hours** of analysis and validation.
-

LEADERSHIP

Data Science Student Society, La Jolla, CA (September 2022-Present)

Vice President Internal (May 2025-Present)

Workshops Team Director (September 2022-May 2025)

- Led internal operations, recruitment, and cross-team coordination for a student organization serving **200+ members**.
 - Designed and delivered hands-on machine learning and data science workshops to **40+ students per session**.
 - Coordinated with academic and industry partners to deliver technical programming aligned with student career outcomes.
-

SKILLS

- **Programming Languages:** Python, SQL, Java, Linux, Git, HTML/CSS, JavaScript
- **Data & Analytics:** Pandas, Jupyter, Scikit-Learn, Seaborn, Tableau
- **Engineering & Tools:** Flask, AWS EC2 instances, n8n
- **Mathematics:** Calculus, Linear Algebra, Graph Theory
- **Other:** Google Workspace, Technical Documentation, Conversational Japanese

2025-2026 (FA25)

Camille Sicat

camillesicatwork@gmail.com | (714) -837-0681 | <https://www.linkedin.com/in/camille-sicat-8b3267256/> | <https://github.com/couchsnail>

Fourth-year Data Science major at UC San Diego with a passion for leveraging data analytics and technology to drive organizational efficiency and strategic insights. Experienced in technical support, research, and cross-functional collaboration across academia, startups, and student leadership.

EDUCATION

University of California, San Diego

- Bachelors of Science in Data Science, Expected June 2026
- 3.6 GPA, Eleanor Roosevelt College Provost Honors

EXPERIENCE

UC San Diego ITS Service Desk (*September 2025-Present*)

Service Desk Technician

- Delivered responsive IT support to UCSD community members, translating complex technical concepts for diverse users.
- Streamlined workflows using documentation and domain expertise to identify recurring issues, improving service quality for over 30 users.

KynosAI (*July 2025-September 2025*)

Discovery Intern

- Conducted market research to inform the design of a gamified educational app.
- Built n8n automation pipelines to support product marketing and internal operations.

Knight Lab, UC San Diego (*April 2025-Present*)

Research Software Developer

- Automated A/B testing data extraction with Python, boosting lab efficiency by 50%.
- Developed Google Apps Script tools to streamline internal communication and outreach.

Halicioğlu Data Science Institute Intel Research Team (*June 2025-September 2025*)

Student Researcher

- Investigated the impact of personal computer usage on power infrastructure through data-driven research and analysis..

Rucio-SENSE Data Movement Manager (DMM), Wurthwein Lab UCSD, CA (*February 2024-September 2024*)

Iris-HEP Fellow | <https://iris-hep.org/fellows/couchsnail.html>

- Updated DMM transfer metrics to frontend for UCSD CMS Team 2, enhancing researcher visibility and access to data.
- Correlated network transfer metrics between Prometheus and FTS, optimizing data movement for international research teams at CERN.
- Developed a DMM daemon to proactively message users on transfer performance, improving efficiency and user experience.
- Contributed to network throughput calculation formula for DMM monitoring alongside UCSD CMS Team 2.

LEADERSHIP

Data Science Student Society, La Jolla, CA (*September 2022-Present*)

Vice President Internal (*May 2025-Present*)

Workshops Team Director (*September 2022-May 2025*)

- Led internal communications, hiring, and external outreach to academic and industry partners.
- Designed and taught hands-on ML workshops to 40+ students using AWS and cloud tools.

SKILLS

- **Technical:** Python, Pandas, Jupyter Notebooks, SciKit-Learn, Java, Flask, HTML, SQL, Seaborn, AWS, Linux, Regex, BeautifulSoup, Google Apps, JavaScript, CSS, n8n
- **Other:** Calculus, Linear Algebra, Graph Theory, Google Workspace, Conversational Japanese

2025-2026

Camille Sicat

csicat@ucsd.edu | (714) -837-0681 | <https://www.linkedin.com/in/camille-sicat-8b3267256/> | <https://github.com/couchsnail>

Rising fourth-year Data Science major at UC San Diego with a passion for leveraging data analytics to drive real-world impact. Experienced in developing workshops, collaborating on technical projects, and actively contributing to research as an Iris-HEP Fellow. Proficient in Python, Pandas, Jupyter Notebooks, Java, and various data science tools.

EDUCATION

University of California, San Diego

- Bachelors of Science in Data Science, Expected June 2026
 - 3.6 GPA, Eleanor Roosevelt College Provost Honors
-

EXPERIENCE

Knight Lab, UC San Diego (April 2024-Present)

Research Software Developer

- Automated A/B testing data extraction with Python, boosting lab efficiency by 50%.
- Developed Google Apps Script tools to streamline internal communication and outreach.

Rucio-SENSE Data Movement Manager (DMM), Wurthwein Lab UCSD, CA (February 2024-September 2024)

Iris-HEP Fellow | <https://iris-hep.org/fellows/couchsnail.html>

- Updated DMM transfer metrics to frontend for UCSD CMS Team 2, enhancing researcher visibility and access to data.
- Correlated network transfer metrics between Prometheus and FTS, optimizing data movement for international research teams at CERN.
- Developed a DMM daemon to proactively message users on transfer performance, improving efficiency and user experience.
- Contributed to network throughput calculation formula for DMM monitoring alongside UCSD CMS Team 2.

IBM Accelerate, La Jolla, CA (June 2024-July 2024)

IBM Accelerate Consulting Participant

- Collaborated to develop innovative technological solutions in a real-world case study for customer retention and grocery stockouts, demonstrating a client-centric approach.
- Proposed personalized in-store strategies projected to increase Gen Z engagement by 30%.
- Coordinated with team members to improve store stocking efficiency in a real-world case study by 20%.

Deloitte x UCSD Halicioğlu Data Science Institute Mentorship Program, La Jolla, CA (April 2024-June 2024)

Deloitte Mentee

- Built predictive ML models in a business case simulation, targeting \$11.5B in potential profit gains.
-

LEADERSHIP

Data Science Student Society, La Jolla, CA (September 2022-Present)

Vice President Internal (May 2025-Present)

- Managed internal communications and hiring strategy for executive board.
- Led external outreach to industry partners and academic collaborators.

Workshops Team Director (September 2022-May 2025)

- Designed and taught hands-on machine learning workshops to 40+ students using AWS and cloud tools.
 - Produced 30+ educational videos and curated content to support continued learning.
 - Collaborated with HDSI to host university-wide exploratory data science events.
-

SKILLS

- **Technical:** Python, Pandas, Jupyter Notebooks, SciKit-Learn, Java, Flask, HTML, SQL, Seaborn, AWS, Linux, Regex, BeautifulSoup, Google Apps, JavaScript
- **Other:** Calculus, Linear Algebra, Graph Theory, Google Workspace, Conversational Japanese

IBM Accelerate, La Jolla, CA (June 2024-July 2024)

IBM Accelerate Consulting Participant

- Collaborated to develop innovative technological solutions in a real-world case study for customer retention and grocery stockouts, demonstrating a client-centric approach.
- Designed customizable in-store shopping experiences projected to increase appeal to younger customers by 30%.
- Coordinated with team members to improve store stocking efficiency in a real-world case study by 20%.

Deloitte x UCSD HDSI Mentorship Program, La Jolla, CA (April 2024-June 2024)

Deloitte Mentee

- Collaborated to develop machine learning models that, in a real-world case study, could increase profits by \$11.5 billion.
-

LEADERSHIP AND EXTRACURRICULAR ACTIVITIES

Data Science Student Society, La Jolla, CA (September 2022-Present)

Workshops Subcommittee Director

- Led the design and delivery of machine learning workshops, reaching 40+ undergraduate students and improving technical proficiency with cloud-based tools and AWS tutorials.
- Coordinated cross-functional teams to drive outreach, resulting in increased workshop participation and student engagement.
- Delegated and managed workshop content creation and team tasks, providing 30+ students with video workshops to enhance knowledge retention.
- Organized exploratory data science events in collaboration with the Halicioğlu Data Science Institute, fostering a deeper interest in data science among undergraduates.

UCSD Rotaract, La Jolla, CA (September 2022-Present)

Volunteer

UCSD School of Physical Sciences Cohort Program, La Jolla, CA (September 2022-Present)

Peer Mentor

SKILLS

- **Technical:** Python, Pandas, Jupyter Notebooks, SciKit-Learn, Java, Flask, HTML, SQL, Seaborn, AWS, Linux, Regex, BeautifulSoup
- **Other:** Calculus, Linear Algebra, Graph Theory, Google Workspace, Conversational Japanese
