

Nikita Jain

(408) 823- 6799, 711nikitaj@gmail.com

(June 22, Sept 14)

Education

University of California San Diego, Sept 2024- June 2028

120 credits

Data Science Major, Business Economics Minor, 4.0 GPA

Experience

Miller Center, Santa Clara, CA – Intern

June 2025 - September 2025

- Collected research on 300 social enterprises for global-impact business accelerator
- Implemented Pandas and Python for data manipulation to uncover trends and develop a quantitative definition of a “locally-led” enterprise
- Presented interactive visualizations, findings, and recommendations to board members at each stage and implemented a finalized definition and requirements to determine classifications

Lumnus Consulting Group, San Diego, CA – Data Analytics Consultant

March 2025 - PRESENT

- Completed 10 week Intern Training Program and developed finalized report and documentation highlighting development details for a centralized website for the application process
- Currently building functional website to track attendance, applications, feedback, event information, and data analysis using HTML, Javascript, and Java

Women In Computing Project Team, San Diego, CA – Team Leader

Sept. 2024 - Dec. 2024

- Developed a functional website over 8 weeks in a team setting using HTML and Javascript as a guide for UCSD students to find activities, study spots and dining halls based on individual user preferences
- Obtained honorable mention for website by intersecting creative ideas with practical technological skills

On the Go Energy , San Jose, CA – CFO

Sept. 2022 - May 2024

- Developed an extensive start-up business plan, pitched to VCs at Radar partners
- Developed financial statements and analysis, helped develop prototype with manufacturers for market testing
- Participated in an esteemed business incubation program at Santa Clara University

Gram Vaani, New Delhi, India – Intern

May 2023 - Sept. 2023

- Worked at social enterprise aiming to bridge knowledge gap through an interactive, social-media platform that implements AI
- Visited rural areas to obtain first hand accounts from target market, and developed a finalized case report summarizing data from first-hand and second-hand research for investors
- Organized and moderated user-generated content through Microsoft office

Projects

BRG Energies, Consultant

Nov 2025 - PRESENT

- Conducted market research, customer exploration, developing platform specific engagement strategies
- Produced and presented final timeline, mockups, and deliverable to client

Image and Audio Classification System

Jan 2025 - March 2025

- Designed, trained, and finalized image and audio classification models using Python, improving automated dataset labeling and recognition accuracy.

Custom Data Processing Framework

March 2025 - June 2025

- Engineered a Java-based DataFrame system modeled after Pandas, enabling high-performance data storage, indexing, and manipulation.

Skills

Python, Java, JavaScript, HTML, Pandas, Statistical Analysis, Data Collection and Visualization, Web Development, Microsoft Office
