SUMMARY

- Detail-oriented **Data Science undergraduate** with a robust academic background in **business analytics, data management, artificial intelligence (AI)** and **machine learning (ML)**
- Proven ability to apply ML techniques in both **academic research and industry projects**, transforming data into actionable insights to solve real-world problems
- **Certified by AWS and Microsoft** in AI and cloud technologies, demonstrating proficiency in scalable, cloud-based ML solutions

EDUCATION

University of California San Diego (UCSD) – La Jolla, CA

Bachelor of Science in Data Science (Minor in Mathematics)

Expected March 2026

GPA: UCSD Overall 3.88 | Major 3.92

Focused coursework in Business Analytics, Data Management & Visualization, AI and ML

- Led multiple projects involving **exploratory data analysis (EDA)**, **data preprocessing**, and **statistical modeling** using Python, scikit-learn, and PyTorch
- Completed core computer science classes: *Computer Systems and Assembly Language and Lab, Programming Abstractions: Python, Computer Systems and C Programming, Introduction to Data Structures and Algorithms*

SKILLS AND CERTIFICATIONS

- **Microsoft Certified:** Azure AI Fundamentals (July 2025)
- **AWS Certified:** AI Practitioner (August 2025), Solutions Architect – Associate (September 2025)
- **Programming languages:** Python, C, C++, Java, JavaScript, MATLAB, R and SQL
- **Machine Learning:** Sci-kit Learn, PyTorch, Tensorflow
- **Data Visualization:** Tableau, d3.js, ggplot

EXPERIENCE

Capstone Project - Cotality (formerly CoreLogic) - Irvine, CA

Aug 2025 – Present

- Improved national property data accuracy using **ML and geospatial analysis** for risk assessment
- Applied **classification models, data quality frameworks**, and **feature engineering** to detect and resolve cross-county inconsistencies
- Worked with large-scale geospatial datasets, gaining hands-on experience in **data cleaning, normalization, and model deployment** in industry settings

MixLab (Dr. Zhiting Hu Research Group, UCSD) - La Jolla, CA

Jul 2024 – Present

Undergraduate Research Assistant

- Conducted research to advance AI and ML models related to **World Models** and embodied intelligence
- Built Python-based simulation pipelines using ThreeDWorld and Ai2Thor for AI model evaluation
- Supported end-to-end development of **GUI Agent models**, exploring innovative training methods

IDX Exchange LLC – Meridian, ID

Jan 2025 – April 2025

Data Scientist Intern

- Developed predictive models and machine learning algorithms to forecast property prices and financial metrics
- Integrated multi-source data into relational databases for analytics readiness and performance optimization

SkyIT Ltd. (Part of GBCS Group) - Calgary, Canada

Jun 2024 – Sep 2024

Digital Marketing/Business Analyst Intern

- Analyzed digital performance metrics to deliver actionable insights improving marketing KPIs.
- Supported updates to CRM and project management tools, enhancing data visibility and campaign efficiency

UCSC Career Center – Santa Cruz, CA

Sep 2022 – Jun 2023

Administrative Assistant

- Supported daily operations and contributed to the planning and logistical execution of career-focused events, including workshops, job fairs, employer information sessions, and on-campus interviews
