## EDUCATION

---

### University of California, San Diego

La Jolla, CA

*Bachelor of Science in Data Science | GPA: 3.84/4*

*Expected June 2027*

Relevant Coursework: Probabilistic Modeling and Machine Learning, Data Visualizations, Practice of Data Science, Relational Data Management, Machine Learning: Learning Algorithms, Product Marketing and Management

## EXPERIENCE

---

### Data Analyst Intern

June 2025 – August 2025

*ECGO*

*Atlanta, GA*

- Analyzed 30,000+ user app recycling submissions to identify trends and inform executive retention strategies.
- Developed and trained a computer vision model to detect brand names from user-submitted recycling photos achieving 70% accuracy.
- Collaborated with UX, Sales, Marketing, and Analytics teams to share insights that translated into strategies and experiments.

### Data Scientist

February 2024 – February 2025

*Biokind Analytics*

*San Diego, CA*

- Partnered directly with nonprofit executive teams to perform exploratory analysis on 20,000+ donor records.
- Prompt engineered an LLM workflow to generate personalized letters, reducing manual drafting time by 50%.
- Built an automated data cleaning pipeline and live updating web dashboard that delivered real-time user metrics to executives.

## PROJECTS

---

### Scikit-Learn: Under the Hood | *Python, FastAPI, React, D3.js*

October 2025 – December 2025

- Deployed a full-stack web app on Render that visualizes core ML algorithms with interactive step-by-step execution traces to help students understand model behavior beyond black-box outputs.
- Implemented a Python/FastAPI backend that returns JSON outputs, and integrated it with a React frontend for real-time UI updates.
- Developed interactive visualizations using D3.js and Plotly to improve interpretability and engagement.

### League of Legends Tower Analysis | *Python, Scikit-learn, Matplotlib, Pandas*

March 2025 – April 2025

- Performed data cleaning, EDA, hypothesis testing, and feature engineering on a 150k+ record dataset of professional League of Legends matches.
- Developed an end-to-end machine learning pipeline to predict a team's end-of-match tower count, reaching 86% accuracy.
- Conducted fairness analysis using permutation tests to ensure consistent model performance across a diverse set of teams.

### Does National Debt Determine Quality of Life? | *Python, Scikit-learn, Pandas*

January 2025 – April 2025

- Led a team of 5 to perform EDA, hypothesis testing, and predictive analysis on multiple datasets totaling 10,000+ entries across different socioeconomic factors.
- Built a machine learning pipeline predicting the happiness score of a nation with 85% accuracy.

## TECHNICAL SKILLS

---

**Languages:** Python, Java, C#, R, SQL, JavaScript, HTML, CSS, TypeScript

**Developer Tools:** AWS, Unity, Git, Jupyter Notebook, Microsoft Excel, Tableau

**Frameworks/Libraries:** Django, Pandas, NumPy, Plotly, Scikit-learn, Seaborn, BeautifulSoup4, PyTorch, React
