EDUCATION

University of California, San Diego

La Jolla, CA

Bachelor of Sciences in Data Science, Minor in Mathematics

Sep. 2024 – Expected: June 2028

Relevant Courses: Principles of Data Science, Data Structures, Theoretical Foundations of Data Science,

Linear Algebra, Calculus 1-3, Micro/Macro Econ, Econometrics

TECHNICAL SKILLS

Languages: Python, Java, Javascript, SQL, Excel, R, MatLab

Developer Tools: Git, VS Code, Visual Studio, IntelliJ, Eclipse, Jupyter

Frameworks: Node.js, Flask, PyTorch, TensorFlow, Tableau, Keras

Libraries: pandas, NumPy, Matplotlib, Seaborn, Kaggle

EXPERIENCE

Research Analyst/Journalist

March 2025 – Present

Eclipse Analytics

La Jolla, CA

- Utilized **Python, SQL, and Java** to research various sports leagues within UCSD, and analyze their growth
- Made and published over **50** data visualizations, leading to over **10+** articles published over time
- Maintained connection with over **50+** active UCSD players, allowing for consistent communication and feedback
- Used these articles to send to various sports team, connecting with over **10+** teams across the state

Business/Data Analyst

July 2023 – Aug. 2023

ZIZO Tech Company

Riverside, CA

- Created **5+** product reports daily using **Python, Java, Javascript** and created datasets based on product info
- Presented visualizations weekly using **Pandas** and conducted weekly meetings with **5+** project managers
- Preserved connections with **50+** businesses, improving satisfaction ratings and driving collaborative opportunities
- Applied results from reports to lead the team on three successful projects, enhancing efficiency by **20%**

PROJECTS

Locked-In, Phone Jail Cell | *C++, Arduino IDE, MongoDB,*

Sep. 2025 – Dec. 2025

- Built a **Next.js** web application with **MongoDB** authentication to manage user logins, tasks, and session data
- Developed **backend APIs** enabling real-time communication between the web app and the Arduino system
- Programmed firmware in **C++ (Arduino IDE)** to execute commands from web app and control the lock + timer
- Integrated **full-stack software** with embedded hardware to create a seamless, automated productivity system

Sports Research Writing Project | *Python, Pandas, Seaborn, Matplotlib*

June 2025 – Sep. 2025

- Analyzed a Kaggle NFL database to identify which offensive strategies correlated with historical team success
- Determined whether teams running the ball more versus passing the ball achieved a higher win rate per season
- Utilized **Python, Pandas, and Matplotlib** to process data, analyze metrics, and create visualizations
- Published the findings on **Medium** concluding that run-heavy teams had higher win rates, reaching **100+** readers

Image Processing App | *Java, React, Next.js, Marcel, Git*

Jan. 2025 – March 2025

- Worked within a team to develop an image processing app. capable of altering pixels for photo editing and design
- Created a web-app using **Java, JavaScript, and Next.js** that allows users to input and manipulate images
- Engineered the front and backend to provide a interface for image editing that can take **5+** images at a time
- Developed a fully functional photo editing/design web app, used by the team for advanced image alteration

Science and Engineering Research Project | *Python, Pandas, Matplotlib*

Aug. 2023 – March 2024

- Collaborated with peers to explore how fruit peels chemical bonds can be turned into biodegradable napkins
- Conducted multiple experiments to see how bonds can be broken apart to absorb liquid molecules
- Used **Python** to conduct **20** data frames of the results and graph them in multiple results
- Entered top **20** of our school and qualified for the **Riverside County Science and Engineering Project Fair**
