EDUCATION

University of California, San Diego <i>B.S. in Data Science & B.A. in Economics</i> • GPA: 3.83	Sept. 2023 - Present <i>La Jolla, CA</i>
University of California, Riverside <i>B.S. in Computer Science</i>	Sept. 2022 - June 2023 <i>Riverside, CA</i>

EXPERIENCE

University of California, San Diego <i>Research Assistant</i> - Built automated data engineering pipelines to process large-scale government household surveys from multiple countries. - Aggregated and structured government survey data to support poverty alleviation and economic development research projects.	Winter 2024 – Present <i>Remote</i>
UCSD Data Science Student Society <i>Workshop Director</i> - Lead a team to design and deliver workshops on modern Data Science technologies for students and faculty. - Direct outreach events introducing data science to local San Diego schools. - Developed and taught content on topics such as NLP, SQL, Deep Learning, web scraping, EDA, AWS, and SageMaker.	Autumn 2023 – Present <i>La Jolla, CA</i>
IDX Exchange <i>Data Science Intern</i> - Developed and optimized ML models using CRMLS data to predict California property closing prices. - Built a state-level ensemble valuation model that achieved 15% MAPE on closing price predictions. - Created comprehensive documentation and presented key findings and modeling process to stakeholders.	Winter 2024 – Spring 2025 <i>Remote</i>

PROJECTS

Like Me - A Celebrity Look-alike App <i>Python, HTML, JS, CSS, FastAPI</i> - Built an application matching user photos to the top 3 celebrity look-alikes from a database of 500+ celebrities. - Developed a full-stack platform with an HTML/JavaScript/CSS front end and Python/FastAPI back end. - Achieved 500+ uses within 24 hours of launch.	Spring 2025
NBA Logistic Regression Prediction Model <i>Python, Scikit-learn, Flask, Selenium</i> - Developed automated webscraper to collect over 2 million points of data from nba.com. - Trained logistic regression model that gives probability of victory based on a plethora of advanced statistics.	Summer 2024
Dinosaur Evolution Simulation <i>Python, Pygame</i> - Created a simulation utilizing genetic algorithms to simulate evolution within generations of dinosaurs. - Developed game to simulate modular environments using Pygame.	Spring 2024

TECHNICAL SKILLS

Languages: Python, C++, HTML5, SQL, Javascript, CSS

Technologies: Numpy, TensorFlow, Keras, PySpark, Selenium, Chromedriver, AWS Sagemaker, Scikit-learn, Flask, React, Next.js, Tailwind, Pandas, Git

Concepts: Database management, Web Mining, Recommender Systems, Exploratory Data Analysis, Artificial Intelligence, Machine Learning, Deep Learning, Neural Networks, Data Visualization, Linear Regression, Logistic Regression, Tree Classifiers/Regressors, Agile Methodology, Microeconomics, Macroeconomics, Econometrics, Discrete Mathematics

AWARDS & HONORS

Datahacks Award Winner: Won 5th overall in a hackathon of over 300 participants.	Spring 2024
Cutiehack Award Winner: Won best overall in sustainability in a hackathon of over 500 participants.	Autumn 2022
Eagle Scout: Highest rank within Boy Scouts of America, from Troop 104.	Spring 2022
