EDUCATION

University of California, San Diego

B.S. in Data Science and Cognitive Science

- Minors in Mathematics and Supply Chain Management
- GPA: 3.90

La Jolla, CA

Sept 2023 - June 2027

EXPERIENCE

SDE Intern

Amazon Web Services

June 2025 – September 2025

San Diego, California

- Built a machine learning-based anomaly detection service for AWS EC2 deployments, reducing manual vetting effort and enabling faster rollback decisions across hardware deployment pipelines.
- Participated in on-call shadowing and implemented a robust data pipeline for deployment telemetry, improving reliability monitoring and rollback readiness.

Data Science Intern

Hey Social Good

October 2024 – June 2025

La Jolla, California

- Partnered with CEO Dr. Cindy Lin to spearhead classification tasks for company sustainability data, processing 10,000+ data points to develop machine learning models for improving subjective sustainability scoring.

Research Assistant

Chiba Lab, UC San Diego

April 2025 – Present

La Jolla, California

- Developing a data pipeline for an IoT-based educational platform leveraging embedded systems, supporting real-time classroom analytics for 30+ devices and a forthcoming research publication.

Instructional Assistant

Halcioğlu Data Science Institute, UC San Diego

January 2025 – Present

La Jolla, California

- Supporting 200+ students in Database Management Systems and Theoretical Foundations of DS by maintaining the course website, hosting office hours, and developing SQL, Python, and ML demos to enhance student learning.

PROJECTS

Fire-Ready Forests | *Python, E.D.A., Machine Learning*

- Led ML modeling and data engineering for ecological tree classification in close collaboration with environmental scientists, achieving 89.6% PFT accuracy and $\sim 99\%$ R^2 CBH/CR imputation across 500K+ TLS records.
- Integrated field and LiDAR data to iteratively improve minority-class predictions to within $\pm 10\%$ of true forest distributions. Awarded 2nd place in SDSC's National Data Platform Challenge.

Comparative Analysis of Stable Diffusion & cDC-GANs | *Python, PyTorch, GANs, Diffusion*

- Built a PyTorch pipeline to tune GANs across multiple loss functions and optimizers; benchmarking Stable Diffusion vs. conditional DC-GANs on CelebA (IS=6.85, FID=164) and CIFAR-10 (IS=5.2, FID=92).

LEADERSHIP

President

Data Science Student Society @ UC San Diego

April 2025 – Present

La Jolla, California

Captain

AWS Cloud Club at UC San Diego

November 2025 – Present

La Jolla, California

Leader

Google Developer Group on Campus University of California - San Diego

December 2025 – Present

La Jolla, California

TECHNICAL SKILLS

Programming: Python, SQL, Java, C++, C, JavaScript, HTML, CSS, Git/GitHub, APIs

Software Tools: Pandas, Numpy, Matplotlib, Scikit-learn, Pytorch, Tensorflow, Apache Spark, AWS Cloud

Domains: Cloud, ML/AI, GenAI, Data Structures & Algorithms, Full-Stack, Data Visualization, Agile Development

Soft Skills: Project Management, Organization, Presentations, Detail-Oriented, Communication, Quick-Learner
