EDUCATION

University of California, San Diego

San Diego, CA

Bachelor of Science in Data Science, Minor in Business Analytics

Sept. 2024 – Expected June 2028

- **GPA:** 3.72 / 4.00
- **Relevant Coursework:** Data Structures & Algorithms (DSC30), Principles of Data Science (DSC10), Data Science Programming (DSC20), Linear Algebra (MATH18), Theoretical Foundations of Data Science (DSC40A), Applied Market Research (MGT108R)

TECHNICAL SKILLS

- **Languages:** Python (Intermediate), SQL (Intermediate)
- **Machine Learning & Statistics:** Scikit-learn, Regression, Classification, Survival Analysis, Ensemble Methods
- **Data Engineering:** API Integration, ETL Pipelines, Data Cleaning (Pandas), NumPy
- **Visualization:** Matplotlib, Seaborn, Tableau (In Progress)
- **Tools:** Git, GitHub, Jupyter Notebooks, VS Code, Excel

PROJECTS

TubeScope - Viral Trend Predictor | 3rd Place Winner, DS3 Showcase

Oct. 2025 – Present

- Selected as one of 40 students (from 240+ applicants) to participate in the Data Science Student Society projects team; awarded **3rd Place** in the “Best Project” category out of 10 teams.
- Identified a “24-Hour Cliff” in viral video trends (83% drop-off) using **Survival Analysis** (Kaplan-Meier) and engineered a Random Forest Classifier to predict longevity, achieving **68% Recall** and a **3x lift in Precision**.
- Designed the backend data pipeline using Python to automate daily ingestion from the YouTube Data API, cleaning and normalizing records to support the team’s dashboard.
- Validated model performance against live production data, finding that Channel Authority metrics were stronger predictors of survival than metadata optimization tags.

Uber & Lyft Fare Prediction Model | Python, Scikit-learn, Matplotlib, Seaborn, Pandas

Sept. 2025

- Developed a Linear Regression model to forecast ride-share prices across 600k+ rows of data, achieving an **R-squared of 0.93** on the test set.
- Engineered time-based features and analyzed coefficients to identify ‘Surge Multiplier’ and ‘Distance’ as the primary drivers of cost.
- Conducted residual analysis to diagnose model bias, identifying that accuracy degraded on ‘Luxury’ tier rides due to class imbalance.

Strategic Analysis of ADCC Grappling (1998-2022) | Python, Pandas, Matplotlib, Seaborn

Aug. 2025

- Analyzed a dataset of 1,000+ historical matches to map the strategic evolution of “Winning Methods” over 24 years of competition.
- Quantified a strategic shift from high-risk submissions in early rounds to conservative “point-fighting” tactics in finals, visualizing the data to tell a clear narrative of sport evolution.
- Developed 100% stacked bar charts to profile the Top 10 historical performers, visually breaking down their win composition (submission vs. points) to highlight individual stylistic preferences.

EXPERIENCE

LA County Pool Lifeguard

Santa Clarita, CA

Castaic Aquatic Center

June 2023 – Present

- Analyze hourly water quality metrics (pH, chlorine) to ensure compliance with county safety standards.
- Coordinate with a team of guards to maintain 100% coverage of high-traffic zones, resulting in zero safety incidents.

Swim Instructor

Santa Clarita, CA

College of the Canyons

Feb. 2023 – April 2023

- Managed progress tracking for 70+ students, communicating technical feedback clearly to parents and adapting teaching methods to individual skill levels.
