Experience

Company 1 Fullstack Software Developer Consulting Engagement with AgencyName	Remote 05/2024 – Current
---	-----------------------------

- **Developing:** Develop new website features in alignment with business requirements, ensuring seamless user experience; responsible for facilitating demo of features to client
- **Data Querying:** Implement jQuery AJAX calls to a REST API, ensuring reliable operations for data integrity and performance using OWASP principals
- **Automating:** Build, test, and deploy automated CI/CD pipelines using Jenkins. Utilize Kubernetes for efficient pod management, ensuring scalable, reliable deployment of applications
- **Designing:** Design resilient user interfaces (UI) using Angular and Bootstrap, adhering to cross-platform design standards
- **Unit Testing:** Increase SonarQube coverage to 88.9% by writing and implementing JUnit tests with Amazon Bedrock AI models, enhancing software reliability
- **Cloud:** Initiate and deploy application infrastructure with AWS, gaining hands-on experience with EC2, S3, and IAM to support development workflows
- **Documentation:** Leverage AI to document over 2,000 database tables, ensuring clear system knowledge, reducing ramp-up time for engineers, and speeding up day-to-day development

Company 2 Software Engineering Intern	City, State 06/2022 – 08/2022
---	----------------------------------

- **Daily Standup:** Lead daily standup meeting discussing team member and cross-team accomplishments, blockers, or questions/concerns
- **Monitoring:** Improve observability and user metrics by 13% through Grafana monitoring and dashboards
- **Unit Testing:** Developed Mockito test cases, utilizing a staging environment with dummy data to validate and debug services before deploying to real users
- **Event-driven Architecture:** Implemented Kafka-based event streaming to handle real-time digital notifications, enabling scalable and reliable message delivery across microservices
- **Version Control:** Collaborated via GitLab code reviews and pull requests, promoting shared ownership and continuous improvement

Education

University of - B.S. in Computer Science • Dean’s List 2019 • President’s List Spring 2020	City, State 05/2019 - 12/2023
--	----------------------------------

Skills

- **Languages:** JavaScript, TypeScript, Java, HTML/CSS, PostgreSQL
- **DevSecOps:** CI/CD (Jenkins, GitLab CI), Docker, Kubernetes, AWS
- **Environments/Tools:** Spring Boot, REST / OpenAPI (Swagger), Maven, Bootstrap, Angular, Git, Nginx
- **Security:** SonarQube
