Education

Rensselaer Polytechnic Institute (RPI) Expected 2027
Bachelor of Science in Computer Science, Information Technology and Web Science *Troy, NY*
Software Coursework: Algorithms, Data Structures, Principles of Software, Web Systems, Foundations of HCI
AI Coursework: Deep Learning, Deep Learning on Graphs, Intro AI, Machine Learning from Data, Linear Algebra

Experience

Project Lead, Backend Developer September 2025 – Present
Freelance work for Finance Club & Business Professor *Troy, NY*
- Pitched a portfolio dashboard and stock valuation automation tool to improve management of $200k portfolio
- **Reduced load time by 87%** with custom TTL cache that multithreadeds requests for blocking API calls
- Developed a **prize-winning hackathon chatbot for Bloomberg Terminals** to support non-technical users.

Course Mentor January 2025 – Present
Rensselaer Center for Open Source *Troy, NY*
- **Enforced quality/quantity standards for 60+ people** over 20 projects through weekly code reviews
- Gave workshops on Graph Neural Networks and Neural Networks from scratch to 60+ people.

Software Engineering Intern May 2025 – August 2025
HARP Research *Troy, NY*
- Designed a data pipeline to a MySQL database **scraping 2500 dynamic items/day** and avoiding bot detection
- Deployed a 40k+ interactions/week Twitter Bot with OpenAI API capable of responding to users in real time
- Developed an **NLU ecommerce chatbot** with product recommendation, order lookup, and SlackAPI integration

Projects

Backend Dev for Beekeeping Mobile App | *Software Design, Express, MongoDB* August 2025 – Present
- Conducted user surveys/interviews of **100+ people**; turned data into app MVP and identified desired features
- Built Express backend with JWT auth, 2FA login, TTL cache for API calls, and a high-performance forum feature

Project Lead, Fullstack Dev for Various Websites | *MERN, Git, Figma, Kanban* January 2024 – August 2025
- Mentored 10+ people in building MERN sites using the GitHub ecosystem and modern workflow methodologies
- Optimized legacy Express backend (**-60% LoC**) to be RESTful, scalable, and integrated with Google Cloud APIs
- Implemented robust privacy systems with JWT tokens, database schemas, and salt+hashing sensitive user data

Project Lead, AI Dev for RL Game Agents | *PyTorch, OpenAI Gym* August 2024 – December 2024
- **Taught 11 people** with zero AI knowledge topics in Neural Networks, Q-Learning, and Decision Tree Theory
- Managed development of Chess, Othello, Pong, and TicTacToe agents using MCTS and DQNs

Graphic Design for Video Game Mod with Over 1 Million Downloads January 2024 – May 2024

Leadership

Research Lead for Artificial Intelligence Club August 2025 – Present
- Developing a novel Optical Music Recognition model pipeline to automate a bottleneck task in music composition

Director of Technology for RPI Competitive Programming Club December 2024 – Present
- Managed internal GitHub repos, DevOps, and web infrastructure for 15+ person club
- Scoped and pitched leaderboard feature backed by contest APIs to boost engagement in club meetings

Founder, President for RPI Piano Club September 2023 – Present
- Founded as a freshman, now managing logistics & recruitment for a 20-person performing arts club
- Launching piano tutoring initiative **with custom scheduling software** to increase campus engagement

Technical Skills

Languages: Python, C++, Javascript, HTML, CSS, PHP, SQL, C, Java.
Frameworks/Tools: React, Express, Flask, Svelte, MERN, AMP, Git, Figma, Kanban.
Databases/Cloud: PostgreSQL, MongoDB, MySQL, MariaDB, Google Cloud, Heroku, Apache, Render, AWS, Azure.
Machine Learning & Data Science: PyTorch, Model Architecture, Data Pipelines, Data Visualization (Matplotlib).
