EDUCATION

School Name (Non Target)

B.S. Computer Science

GPA: 3.94/4.0

December 2026

Coursework: Data Structures and Algorithms, Operating Systems, Object Oriented Programming, Database Management Systems

EXPERIENCE

Company Name

July 2025 – Present

Software Engineer Intern

- Improved backend scalability by engineering Java and Spring Boot microservices, resulting in maintainable services
- Created automatic Splunk alerts for credential health using event-driven triggers, ensuring **99%** system availability
- Performed development and integration testing on internal REST/SOAP APIs, cutting downtime by 20%

School AI/ML Club

September 2025 – December 2025

Full-Stack Intern

- Led 3+ developers building real-time OpenCV/MediaPipe pose detection, improving motion-tracking accuracy
- Orchestrated API integrations between React, FastAPI, and PostgreSQL, boosting video inference speed by 25%
- Developed hybrid rule-based and **PyTorch** pipelines, optimizing CUDA inference for scalable LLM feedback

Company Name

May 2025 – August 2025

Software Engineer Intern

- Built an end-to-end automated data generation pipeline with 99% accuracy, reducing ML model training time by 53%
- Dockerized and deployed as an **AWS Lambda** function via **S3** JSON triggers, improving throughput by **33%**
- Architected **AWS Textract** system for automated key-value extraction with 97% accuracy on 1k+ documents
- Scaled pipeline usage to 20+ engineers on a daily basis, enabling a 5 hrs/week reduction in manual operations

PROJECTS

PaperLink (CalHacks2025 Runner-Up) | Next.js, FastAPI, Claude, Lava, Chroma, Fish Audio

- Built a **multimodal** end-to-end pipeline using Lava to generate concise arXiv research summaries in under **1s**
- Integrated Fish Audio TTS for concurrent audio playback and synchronous text highlighting for vision-impaired users
- Optimized MiniLM–Chroma vectoring with SQLite caching, reducing LLM calls 45% and enabling instant reloads

EVA (Empathetic Voice Assistant) | Python, FastAPI, Whisper, HuggingFace, Groq, ElevenLabs

- Developed a real-time voice-to-voice AI coaching platform for guided self-reflection and supportive guidance
- Engineered a FastAPI backend leveraging Whisper + FFmpeg for speech-to-text, HuggingFace Transformers for emotion classification, and Groq LLMs for context-aware responses, achieving **98%+** transcription accuracy
- Automated text-to-speech synthesis with ElevenLabs API for adaptive, natural audio responses in live conversations

ZeroFootprint | React, FastAPI, Gmail API, PostgreSQL, Redis, Docker

- Built an MCP-driven Gmail API pipeline to scan inboxes and draft privacy requests, minimizing user data exposure
- Implemented Redis job queues and a PostgreSQL schema for re-scans, status tracking, and full audit logs

AI Discord Bot | Python, Meta-Llama, AWS EC2, Flask, Discord API

- Fine-tuned TinyLlama 1.1B model on **40k+** Discord messages, to replicate the user's conversation style
- Deployed the model on **AWS EC2** through Flask via Docker containerization, serving requests across 3 servers
- Integrated data preprocessing workflows to convert 1,000+ messages to JSONL, filtering sensitive information

SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, FastAPI, TensorFlow, PyTorch, Scikit-learn, HuggingFace, OpenCV

Tools & Cloud: AWS (Certified Cloud Practitioner), Docker, Git/Github, MongoDB, PostgreSQL
