

EDUCATION

University

Master of Science in Computer Science

- Coursework: Web Technologies, Analysis of Algorithms

CA

Aug 2025 – Current

University

Bachelor of Technology in Computer Science

India

Aug 2019 – May 2023

EXPERIENCE

Junior Salesforce Developer

June 2023 – Feb 2025

Small IT Firm

India

- Built and customized Lightning Web Components with Apex backend logic to deliver responsive ordering flows.
- Automated recurring business processes using Async Apex and Flows, significantly reducing manual operations.
- Enhanced a virtual try-on kiosk application, improving in-store usability, session handling.
- Developed OmniScripts using DataRaptors and Integration Procedures to guide users through multi-step processes while orchestrating data from Salesforce and external systems.

Artificial Intelligence Intern

July 2022 – Dec 2022

Company Name

India

- Fine-tuned YOLOv5 CNN models on infrared datasets, improving detection accuracy from 88% to 93% through data preprocessing, optimization, and evaluation.
- Implemented an LSTM-based pipeline for human pose estimation on the Penn Action Dataset.

PROJECTS

CloudSphere | React, Node.js, Appwrite, MongoDB

Dec 2025 - Current

- Building a cloud storage system with secure auth, user-isolated storage and public/private file sharing.
- Implemented a modular dashboard with storage usage, favorites, global search and drag-and-drop uploads.
- Designed access control, shareable links, activity tracking, and background jobs for uploads and processing

Ticket.io | React, MongoDB, Express.js, Inngest

June 2025 – Aug 2025

- Built a full-stack AI helpdesk using React, Node.js and MongoDB, implementing role-based access and real-time dashboards to streamline support workflows.
- Automated ticket triage by integrating Google Gemini API and Inngest, achieving instant priority assignment and AI-generated resolution notes via event-driven background processing.
- Optimized system reliability by deploying JWT authentication, Nodemailer alerts, and async workers on Render, ensuring secure, scalable communication and high backend throughput.

Star and Galaxy Image Classifier | Pytorch, TensorFlow, NumPy, Pandas

Feb 2023 – April 2023

- Built and deployed a CNN-based classifier using TensorFlow, achieving 93% accuracy on astronomical datasets.
- Designed an interactive Streamlit interface for real-time predictions processing images efficiently.

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, HTML/CSS

Frameworks: React, Node.js, Express

Salesforce: Apex, Lightning Web Components, Flows, Omniscript, Salesforce Admin

Cloud: GCP, Salesforce Commerce/Sales/Service/Experience Cloud

Developer Tools: Git, Dataloader, Salesforce Workbench

Libraries: Pandas, NumPy, Matplotlib

CERTIFICATIONS

- Salesforce Certified Platform Developer 1
- Salesforce AI Associate

PUBLICATIONS

- Classification of Star and Galaxy Objects Utilizing Machine Learning Techniques and Deep Neural Networks.
