

Education

Georgia Institute of Technology — *Masters in Computer Science* May 2028

University of Houston May 2026

B.S. in Computer Science, Minor in Mathematics — Honors College

Coursework: Database Systems, Data Structures & Algorithms, Networks, Software Engineer, Data Science & Machine Learning, Computer Organization & Architecture, Linear Algebra, Discrete Mathematics, C+

Technologies

Certificates: Azure Developer Associate, Azure AI Engineer Associate, Certified ScrumMaster® (CSM)

Languages: C++, C#/.NET, Python, TypeScript, JavaScript, Java, R, SQL, HTML5, CSS3, Bootstrap, SASS

Frameworks: .NET(Web API, Razor Pages), FastAPI, React, React Native, Next.js, Node.js, Angular

Libraries: ADO.NET (data access), Swagger / Swashbuckle, GraphQL, Vite

Tools: JSON, XML, REST, Azure, Docker, Kubernetes, Git (Version Control), Postman, MySQL, PostgreSQL, SQL Server, Tableau, Jira, Apigee, AWS (Kyndryl), Okta, Datadog, TeamCity, UNIX, OpenAI, Jmeter

Experience

Incoming Software Engineer Intern @  Summer 2026

Software Engineer Intern Houston, TX

May 2025 – May 2026

- Developed 2 enterprise-scale AI assistants(OpenAI's API, FastAPI & C#/.Net Core) enabling 5,000+ business analysts to query real-time data across Tableau/Denodo using NLP
- Presented prototypes to VP & director-level stakeholders in 5+ sessions, gaining feedback that reduced manual reporting time by 40+ hours/month, improving efficiency & enabled faster, data-driven decisions
- Led the end-to-end live deployment process, creating and managing CAB change requests (ServiceNow), coordinating platform teams, & executing production cutovers with validated success
- Conducted stress testing (JMeter) & ensure 99% system uptime through CI/CD pipelines (TeamCity, Octopus) with monitoring (Datadog) & secured API integrations (Okta OAuth, Apigee gateway, AWS Firewall)

Software Engineer Intern

Remote

Jul 2024 – Dec 2025

- Automated CI/CD workflows using GitHub Actions and Azure App Service for 12+ web apps; implemented Docker-based build pipelines with lint/test stages & blue-green deployments, accelerating delivery by 60%
- Managed a 4-member Agile team & introduced code review standards, reusable UI components, & automated testing—reducing feature rollout time by 35% & improving UI responsiveness
- Streamlined data pipelines with SQL & Azure Data Lake Storage,reduce large-scale retrieval time by 34%

Technical Projects

3rd Place Coogs for Energy — Carbon Emissions Tracker  React, Tailwind, Python, CodeCarbon

- Develop Chrome extension to monitor GenAI query emissions, visualize real-time & CO2 impact via dynamic dashboards; implement on-device classification to categorize inputs & promote carbon-aware AI usage.
- Built background & content scripts leveraging Chrome Storage API & messaging for distributed state management & event handling across extension components.

Extracurriculars

Marketing Director —  Jun 2024-Dec 2024

- Led marketing for UH's largest coding club (300+ members), driving campus-wide visibility and engagement
- Secured \$3,200 platinum-tier sponsorship & partnered with Microsoft TEALS, contributing to 500+ new followers and 20% membership growth
