EDUCATION

California State University

Bachelor of Science in Computer Science

California

August 2021 - December 2025

- **Coursework:** Data Structures and Algorithms, OOP, Machine Learning, Mobile App Development, Big Data and Cloud Computing
- **Affiliations:** Brilliant Black Minds, ColorStack, STEM Advantage, CodePath, NSBE

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, Bash

AI/ML: Hugging Face, ChromaDB, Azure ML Studio, Claude API, Prompt Engineering, RAG

Web & Data: React, Next.js, Firebase, MySQL, Pandas, NumPy, Power BI, SAS Viya

Collaboration and Tools: GitHub, GitLab, Confluence, Jira, Visual Studio, Android Studio, Claude Code, Cursor

PROFESSIONAL EXPERIENCE

Full Stack Software Engineering Intern

May 2025 – August 2025

Microsoft

Redmond, WA

- Re-architected a **multi-modal** ML training data pipeline for Bing's generative search on distributed framework, migrating training data from **JSON/TSV** to unified Parquet format; reduced training time by **15%** and increased throughput by **54%** while maintaining model quality (BLEU scores).
- Resolved bottleneck by implementing parallelized **Parquet** loading with **Hugging Face** Datasets library, reducing data load time for **3.5M+** rows by **95%** (from 1 hour to 3 minutes)
- Authored **Python** automation scripts on distributed framework to convert **425GB** of training data to Parquet format, enabling scalable and repeatable dataset preparation workflows across multiple teams in the Bing AI organization.

Software Engineer Intern

May 2023 – May 2025

Southern California Edison

- Built Python automation tools (Pandas, xlwings, VBA) that eliminated repetitive manual data processing, reducing processing time by **90%** and improving operational efficiency.
- Modernized legacy data export system by migrating from Microsoft Access to **Python-based ETL** solution using **SASPy**, increasing export speeds by **35%** and improving data pipeline maintainability.

PROJECTS

TriageFlow | Python, React, ChromaDB, Claude API | CalHacks 2025 | [Link](#)

October 2025

- Built AI-powered emergency triage platform; integrated **RAG (Retrieval Augmented Generation)** architecture with conversational AI for automated patient prioritization.
- Developed RAG pipeline integrating **ChromaDB** vector database with **Claude API**; used **prompt engineering** to ensure ESI-compliant outputs.

Mira | TypeScript, Azure Web PubSub, Azure AI Foundry | Microsoft Global Hackathon (1st Place Health and Wellness)

June 2025

- Co-developed browser extension enabling visually impaired users to navigate the web via voice commands by routing voice/browser data through **Azure Web PubSub** to **Function Apps** to **Azure AI Foundry**, allowing the LLM to execute commands.
- Implemented command execution system in **TypeScript** that translates **GPT-4o** outputs into browser actions (scrolling, clicking, reading content)

CarbonCloset | JavaScript, Next.js, Firebase, Stripe | Bronco Hacks 2025 (3rd Place) | [Link](#)

April 2025

- Co-developed a gamified thrift e-commerce platform targeting 10M+ college students with token currency, mystery box pulls, and market-driven pricing.
- Designed backend architecture using **Firebase Auth**, **Firestore**, and **Admin SDK** with role-based access controls and secure data flows.

Safenest.AI | Python, AWS Bedrock, Claude, Twilio | UC Berkeley AI Hackathon | [Link](#)

June 2024

- Developed AI-powered baby monitoring system identifying hazards via image detection and sending SMS alerts via **Twilio**.
- Implemented hazard recognition feature by integrating **Claude API** via **AWS Bedrock** for image processing and object recognition. Employed **prompt engineering** to predefine danger levels to categorize detected objects.

LEADERSHIP

Vice Chair | NSBE Region V Fall Regional Conference 2025 CPC

September 2025 – November 2025

Executive Assistant | NSBE Region V Fall Regional Conference 2024 CPC

September 2024 – November 2024

Secretary | National Society of Black Engineers Region V

April 2024 – May 2025

VP of Admin & Science Council Rep | Google Developer Student Club Cal State

March 2024 – May 2025
