

Software Developer

- Developed a startup platform with a group of peers using **React.js** and **Spring Boot** with **PostgreSQL** to manage user authentication, product listings, order processing endpoints to facilitate real-time data exchange between the frontend and the database.
- We developed this app for a **Ford philanthropy contest**, our app helps small farmers sell their products online in an easier manner; interviewing multiple farmers, we made sure to make it user-friendly for less savvy people as the median age of farmers are 55 years old.
 - **Key Results:** Won \$25k prize from Ford Philanthropy for social impact; secured partnerships including Redland Ahead, Coral Gables, and Microsoft.
 - **Software:** Spring Boot, Java, React.js, Figma, PostgreSQL, Docker.
