

EDUCATION	
Simon Fraser University <i>Bachelor of Science, Computer Science</i> Courses: Data Structures and Algorithms, Database Systems, Software Engineering, Distributed Systems, Computer Networking	Expected Graduation April 2027 Burnaby, BC
WORK EXPERIENCE	
Electronic Arts <i>Software Engineer Intern</i>	May 2025 – August 2025 Vancouver, BC
- Engineered and deployed an intelligent internal tooling system with LLM RAG pipeline using Python, cutting onboarding time and helping 30+ engineers quickly resolve codebase and documentation questions - Built scalable vector embedding pipeline indexing millions of lines of production code and 300+ documentation pages using token-based chunking with AWS Bedrock embeddings stored in PostgreSQL with pgvector - Designed a custom MCP server with a scoring system to dynamically rank and retrieve from docs, code, chat history, and user feedback, boosting positive user feedback from 29% to 85% - Reduced infrastructure costs by 35% by deploying FastAPI on AWS EKS with pgvector on Aurora, leveraging on-demand AWS Bedrock inference and optimized connection pooling over managed vector search services	
Rivian & Volkswagen Group Technologies <i>Software Engineer Intern</i>	September 2024 – April 2025 Vancouver, BC
- Led mobile development of a 2FA-secured driving feature on iOS and Android using Swift and Kotlin, enabling secure remote commands across all Rivian vehicles directly affecting 10,000+ customers - Implemented fault-tolerant command delivery via APNS and Firestore Messaging with Bluetooth byte/Protobuf fallback, and built time-based one-time passcodes using HMAC encryption and GraphQL for all notification failure scenarios - Prototyped and deployed a native iOS screen recorder to 900+ App Center users for automated bug reporting, capturing pixel buffer screenshots at 30-second intervals	
Avena Tech Corporation <i>Software Developer (Part-Time)</i>	July 2023 – September 2024 Vancouver, BC
- Streamlined deployment by utilizing Bash, Github Actions, and Docker to create a CI/CD pipeline for testing, building, and deploying containers, reducing development time by 50% - Architected a microservices-based platform with containerized REST API endpoints using Express.js, AWS S3, and PostgreSQL, migrating 60+ WordPress blogs to a new efficient system - Restructured VPS infrastructure and provisioned cloud servers with Docker runners and Docker Compose orchestration, reducing infrastructure costs by 40% while enabling custom GitHub Actions runners for accelerated CI workflows	
Simon Fraser University iXLab <i>Undergraduate Research Assistant</i>	April 2023 – September 2023 Vancouver, BC
Developed IMU sensor simulation system in Python for validating machine learning models, processing XYZ accelerometer and gyroscope data from T2M-GPT generated motion sequences	
PROJECTS	
Encrypted P2P Chat App <i>React, TypeScript, WebRTC, PeerJS, Go</i> 	
- Architected a serverless P2P chat application with end-to-end AES-256-GCM encryption using WebRTC, implementing NAT traversal with STUN/TURN servers for 95%+ connectivity - Designed distributed file transfer protocol with chunked streaming, automatic retry logic, and congestion control for reliable large file transfers over unreliable networks	
Personalized AI Discord Bot <i>Python, Node.js, FastAPI, AWS Bedrock</i> 	
- Fine-tuned Meta's Llama2 LLM on 120,000 Discord messages to create a personalized chatbot to respond in the style of the user - Trained and deployed the fine-tuned model on Replicate accessed by a FastAPI endpoint, containerized on Docker and hosted on an AWS EC2 instance, and deployed via PM2 on a personal home Ubuntu server for continuous uptime	
Custom Blog Editor <i>React, Express.js, Node.js, PostgreSQL, Redis, TypeScript</i>	
- Developed a full-stack blog editor which allows users to create, update, and delete blogs to migrate away from Wordpress - Implemented Redis caching layer to reduce database queries to improve response times	
TECHNICAL SKILLS	
Languages: Python, Go, Java, Kotlin, JavaScript, TypeScript, C, C++, SQL, Bash, Swift Backend & Distributed Systems: Docker, Kubernetes, AWS, PostgreSQL, MongoDB, Redis, GraphQL, WebRTC Frameworks/Libraries: React, Next.js, FastAPI, Express.js, Node.js, Jest Developer Tools: Git, Postman, NGINX, Linux, CI/CD Pipelines, pgvector
