Education

University

Sep. 2022 – Dec 2025

Bachelor of Engineering in Software

City, Prov

- **Cumulative GPA:** 85.2% (3.7 / 4.0)
- **Dean's Honour List:** 2022 – 2025

Experience

School Board

Jan. 2026 – Present

Information Services Technician

City, Prov

- Maintain and validate structured data in a live information management system, ensuring consistency and accuracy across collections and tracked IT assets.
- Diagnose and resolve common computer, software, and peripheral issues using systematic troubleshooting approaches.
- Support users by identifying issues, clearly explaining technical solutions, and collaborating with technical staff as needed on more complex cases.
- Follow established procedures for documentation, data handling, and system usage to maintain reliable operations.
- Image, configure, and deploy new workstations, verifying hardware functionality, OS configuration, and user readiness prior to handoff.

Airport

Jul. 2024 – Oct. 2024

Airport Operations Student

City, Prov

- Led a large-scale data management project by validating and reconciling engineering drawings, AutoCAD files, and on-site inspections with a centralized ArcGIS database and map.
- Created and updated geospatial asset records to accurately reflect airport infrastructure, improving data reliability for operations and maintenance teams.
- Independently managed task timelines, produced structured reports, and coordinated with internal staff and external contractors to resolve data and tooling issues.
- Collaborated with electrical supervisors and operations staff to verify circuits, lighting systems, transformers, and underground cable layouts for accuracy and compliance.
- Operated in a safety-critical, regulated environment where correctness, documentation quality, and procedural adherence were essential.

Projects

Smart Invoice Management System | *JavaFX, Python, Flask, OCR, PayPal API, SQLite* Sept 2024 – Apr 2025

- Led development of an end-to-end invoice management system supporting OCR-based invoice scanning, validation, and automated payment processing.
- Designed a JavaFX client and Flask backend with REST-style APIs integrating OCR pipelines and PayPal payments.
- Validated system behaviour through testing workflows, edge-case handling, and formal demonstrations to academic and industry mentors.

Smart Thermostat Microcontroller System | *C, STM32, ARM Cortex-M4, Embedded Systems* Jan 2025 – Apr 2025

- Designed a low-power smart thermostat using interrupt-driven firmware on an STM32 microcontroller.
- Integrated multiple onboard sensors and timers, coordinating sensor sampling, control logic, and system state transitions through hardware interrupts without blocking execution.
- Implemented and validated sleep-wake behaviour to minimize power consumption while maintaining deterministic timing, responsiveness, and reliable control under varying conditions.

Real-Time Hand Gesture Recognition System | *Python, OpenCV, PyTorch, ResNet-18* Sept 2025 – Dec 2025

- Designed and implemented a real-time static hand-gesture recognition system using a consumer-grade webcam, supporting 20 gestures and negative classes with live video inference on low-end hardware.
- Developed and evaluated four ROI extraction pipelines (skin-mask variants, saliency-based, and MediaPipe), experimentally demonstrating ROI quality as the dominant accuracy factor across 1,800 controlled test images.
- Applied transfer learning with a ResNet-18 model trained on 13,756 curated HaGRID images, achieving stable real-time performance while balancing accuracy and low-latency inference constraints.

Technical Skills

Languages: Python, Java, C/C++, JavaScript, SQL, MongoDB, HTML/CSS

Systems & Software: Client-Server Architecture, REST APIs, Payment APIs, OCR Pipelines

Embedded: STM32, Interrupt-Driven Firmware, Low-Power Design, I2C/SPI/UART

ML & Data: PyTorch, TensorFlow, OpenCV, Pandas

Tools: Git/GitHub, Google Colab, Jira, Linux, MATLAB, ArcGIS, AutoCAD

Engineering Practices: Debugging & Validation, System Verification, Technical Documentation, Agile/Scrum
