EDUCATION

University

Bachelor of Science in Software Engineering, GPA: 3.62

City, ST

Dec. 2026

EXPERIENCE

Software Engineering Intern

Aug. 2025 - Dec. 2025

Payroll Provider

City, ST

- Built **Kotlin** microservices to deliver security scans and enable 700+ developers to monitor app vulnerabilities
- Extended API endpoints with batch execution requests to reduce trigger time by 40% for multiple scans
- Reduced record lookup latency by 50% by implementing filtering and regex search in **React** components
- Cut licensing cost overspend by 35% by developing an internal **Python** script to correct developer metrics

System Integration Intern

Jun. 2025 - Aug. 2025

IT Consultancy

Remote

- Designed **Dell Boomi** workflows across e-commerce, CRM, and ERP platforms to process 20K+ records daily
- Led **Mashery** to **Apigee** API migration to achieve zero downtime transition for high-traffic enterprise systems
- Reduced manual transfers by 50% by automating cloud and on-prem data synchronization pipelines

Software Development Intern

Jan. 2025 - May 2025

Data Analytics

Remote

- Developed financial dashboards using **Python** and **React** to visualize 100K+ records for a Fortune 500 client
- Delivered real-time reporting by integrating **Flask** APIs to serve financial metrics to 200+ internal users
- Automated ETL workflows using Python to reduce prep time by 20% and improve downstream data accuracy

Software Developer

Sep. 2024 - Dec. 2024

University

City, ST

- Improved API response times by implementing query indexing and caching to support 120+ users
- Optimized **SQLite** queries and backend logic for a departmental portal to ensure 100% data accuracy
- Fixed **React** and **Semantic-UI** modal state handling to increase form submission success by 25%

PROJECTS

Graphics Engine | C++, 3D Rendering, Linear Algebra

Apr. 2025

- Created a 3D graphics engine implementing matrix transformations for object projections at 1080p resolution
- Developed a rasterizer with triangle clipping and depth buffering to render 50K+ triangles at 30+ FPS

Movie Recommendation Platform | Terraform, AWS Lambda, Cognito, Amplify, S3

Dec. 2024

- Provisioned serverless architecture using **Terraform** across **AWS** to support scalable data ingestion pipelines
- Built Lambda function to fetch TMDb data and upload to **S3** enabling daily updates for 10K+ movie records

Banking Platform | Next.js, TypeScript, Appwrite, Plaid, Dwolla

Sep. 2024

- Enabled bank transfers and ACH payments using **Plaid** and **Dwolla** to process sub-300ms latency requests
- Created RESTful APIs with Appwrite to support secure authentication and payments with 99.9% uptime

Real-Time Chat | Socket.io, JWT, MongoDB, Express.js, React, Node.js

Jul. 2024

- Implemented real-time messaging and user presence detection via **Socket.io** with latency under 100ms
- Designed authentication and REST APIs with **JWT**, **Express.js**, and **Node.js** to manage user data

SKILLS

Languages: Python, Java, Kotlin, C++, C, HTML, CSS, JavaScript, TypeScript

Frameworks: React, Next.js, Node.js, Express.js, AngularJS, Tailwind CSS, Flask

Databases: SQL (PostgreSQL, SQLite, MySQL), NoSQL (MongoDB)

Technologies: Git, Linux, Docker, Podman, Figma, Terraform, AWS
