EDUCATION

University of Western Ontario

London, Ontario

B.Sc. Honours Specialization in Computer Science

Expected April 2026

- GPA: 3.7/4.0 — Dean's Honour List (2024, 2025)

EXPERIENCE

Data Engineering – Research Assistant

October 2024 – Present

Western University - Dept.of Geography and Environment

Tech Stack: Python, Pandas, Openpyxl, NumPy, JavaScript, HTML, CSS

- Built an **automated data processing** application using **Python (Pandas, Openpyxl)** that reduced processing time from **8 hours to 5 minutes**, boosting operational efficiency by **98%**.
- Developed a dataset validation system using **Pandas** and **NumPy**, employing statistical techniques (Z-score, IQR) to detect anomalies and infer trends.
- Created a streamlined web app (**JavaScript, HTML, CSS**) that reduced file download times by **85%** through a click-to-copy feature.

Software Development Intern

May 2024 – August 2024

Pakistan Single Window

Tech Stack: Microsoft Bot Framework, OpenAI API, Pinecone DB, React, Node.js, Docker

- Developed "Polichat," an **AI chatbot** using **Microsoft Bot Framework**, integrated with **Microsoft Teams** for 300+ employees, reducing HR inquiries significantly.
- Built a **Retrieval-Augmented Generation (RAG)** pipeline with **OpenAI embeddings** and **Pinecone DB** to deliver contextually precise responses instantly.
- Created a full-stack web app (**React, Node.js**) with **JWT authentication** for department-wide policy updates, cutting update time by 80%.
- Deployed applications with **Docker**, writing optimized Dockerfiles, orchestrating containers, and ensuring scalable, secure deployments.

Information Technology Intern

June 2022 – Aug 2022

FrieslandCampina

Tech Stack: Microsoft Power Automate, Jira, Microsoft Tools

- Built an internal help request platform with **Power Automate**, streamlining workflow efficiency and integrating **Jira** for advanced task tracking.
- Developed a QR-code based **inventory tracking system**, integrated with **Microsoft user accounts**, to streamline asset management and reduce operational delays.

PROJECTS

Raspberry Pi Home Dashboard | C++, Qt, Python, RAG, Electron, OAuth 2.0, REST APIs, Jira, Git, Bitbucket

- Developed a **C++-based** smart dashboard on **Raspberry Pi** using Qt, featuring adaptive brightness, wake functions, and system monitoring.
- Integrated **OAuth 2.0** authentication and **REST APIs** for YouTube media playback and Google Calendar synchronization.
- Built an **AI-powered to-do list** with **Python**, **Vosk** (speech-to-text), **OpenAI API**, and **SQL** backend for cloud-synced task management.

GeoCraft | Java, Swing, JUnit, Jira, Confluence, Git (Bitbucket), Maven

- Developed "GeoCraft," an educational geography game in **Java** (Swing) featuring event-driven programming and **CSV-based** data persistence.
- Implemented **Agile** development practices using **Jira**, **Confluence**, **Git(Bitbucket)**, and Maven in CI/CD and collaboration.
- Enhanced software reliability by writing automated unit tests with **JUnit**, improving application stability.

SKILLS & INTERESTS

Languages: Python, C++, Java, JavaScript, TypeScript, SQL

Frameworks & Libraries: React.js, Node.js, Openpyxl, Pandas, NumPy

Tools & Platforms: Git, Docker, AWS (EC2, S3), Jira, Power Automate, LaTeX, Linux/Unix

Core Competencies: Agile Methodology, API Development, Full Stack Development, Software Development Life Cycle (SDLC), Generative AI, Natural Language Processing (NLP), Networking, UI/UX Design
