

EDUCATION

University

Nashville, TN

B.S. in Computer Science and Mathematics | CGPA 3.85

Expected Graduation: May 2026

Relevant Courses: Object-Oriented Programming, Data Structures, Algorithms, Operating Systems, Database Management Systems, Software Engineering, Theory of Computation, Linear Algebra, Statistics

Honors: Provost Scholar, Dean's List, Honors Student

EXPERIENCE

Software Engineer Intern

June 2025 – Aug 2025

TransRe (Berkshire Hathaway subsidiary)

New York, NY

- Built a modular dashboard for the TIRS Web portal using **Angular** and **.NET Core**, implementing **10+ widgets** and **RESTful Web APIs** with optimized **SQL queries**, reducing data retrieval time by **20%**.
- Designed a scalable UI based on **Azure DevOps Dashboard** to improve navigation, utilizing a modular front-end architecture.
- Implemented a **CI/CD pipeline** for **automated test scripts** and builds, achieving **80% test coverage** and accelerating iterative development cycles from weekly to daily.

Software Developer Intern

Mar 2025 – May 2025

Museum Advocate (Startup under Blackstone LaunchPad)

Remote

- Developed **2 major features** (donor cultivation and Patron Premium Page) using **Next.js**, enhancing website functionality and user experience.
- Produced clear **technical documentation** for 8 internal workflows in **Confluence**, creating a knowledge base that improved onboarding speed and cross-team collaboration.
- Identified, troubleshooted, and resolved **10+ bugs** through **agile** workflows using **Jira**, improving website performance and reliability.

Undergraduate Research Intern

June 2024 – Aug 2024

National Science Foundation —

- Engineered a decentralized crowdfunding platform using **React** and **Solidity**, deployed on **Ethereum Sepolia**, tested by **50+ users** with **90%+ transaction success**.
- Analyzed blockchain's impact on crowdfunding efficiency and presented findings at the ██████████ **Summer Research Symposium**.

PROJECTS

TradeView — AI-Powered Trading Platform

- Built a full-stack trading platform using **Next.js**, **MongoDB**, and **TradingView APIs**, serving **15 active users** with real-time market data and insights.
- Integrated **Gemini AI** for daily market summaries and stock insights, improving trading efficiency by **45%**.
- Implemented secure auth with **BetterAuth**, automated workflows via **Inngest**, and email alerts with **Nodemailer**.

WriteSphere

- Built a collaborative blogging platform utilizing **relational database design principles in PostgreSQL**; implemented full-text search using **Prisma ORM** for efficient content retrieval.
- Deployed the platform on **Cloudflare Workers + Pages** with secure **JWT authentication**.

SlidesAI

- Developed a tool converting long documents into professional slides, reducing manual effort by **60%** and automating slide generation with **FastAPI** and **Streamlit**.
- Built a semantic understanding and summarization pipeline using **Gemini API**, **LlamaIndex**, and **Hugging Face**, integrating modern AI/LLM techniques effectively.

TECHNICAL SKILLS

Languages: C#, Java, SQL, JavaScript, Python

Libraries/Frameworks: React, Next.js, Angular, .NET Core, Spring Boot, Node.js (Express)

Technologies: Git, Docker, AWS, Firebase, PostgreSQL, Jira, Linux/UNIX, Agile

Machine Learning/AI: PyTorch, TensorFlow, Hugging Face, LLM integration

LEADERSHIP

Team Lead, AUC Mastercard Hackathon (Nov 2024) — Led team analysis of 60K+ records and delivered insights.

Secretary, CS Club (Sept 2024 – Present) — Organized technical sessions, boosted member engagement and club membership.
