Education

McGill University

Bachelor of Computer Science and Minor in Economics

Expected Graduation - Dec 2026

Montreal, Quebec

Work Experience

McGill University

Software Co-op Intern

May 2025 – Aug 2025

Montreal, Quebec

- Engineered and deployed 15+ automated workflows using Power Automate that eliminated repetitive registrar and advising processes, reducing manual handling time by 30% and materially improving operational throughput.
- Re-architected term-start operations for 4,000+ students by consolidating cross-departmental tasks into a unified automated pipeline, cutting manual data entry by 50%.

Coveo

Software Developer Intern

Sep 2024 – Dec 2024

Montreal, Quebec

- Developed 15+ production-quality React/TypeScript demo applications with automated scraping and data-normalization pipelines, elevating Solution Engineer trial engagement and customer-facing clarity.
- Authored precision query-pipeline rules that improved search relevance by 35%, strengthening end-user alignment and showcasing Coveo's intent-driven retrieval capabilities.
- Built an internal automation tool leveraging REST APIs to streamline RGA data configuration, reducing troubleshooting cycles by 50% and boosting natural-language answer retrieval by 30%+.

Ticket Sphere (Startup)

Software Developer

May 2024 – Present

Montreal, Quebec

- Architected and shipped a cross-platform mobile product using Flutter and Firebase, improving UI responsiveness by 30% and backend performance by 25% through scalable data-handling patterns.
- Recognized in the McGill Dobson Lean Startup Program for technical innovation, product execution, and evidence-driven development practices.

McHacks

Development Coordinator

Aug 2025 – Present

Montreal, Quebec

- Led development and maintenance of McHacks web infrastructure by contributing to a React-based static website and supporting a Node.js + MongoDB full-stack dashboard (APIs, server, database), enabling the review and processing of 1,500+ hacker applications and automating operational workflows through custom Discord bots.
- Coordinated planning and execution of McGill University's largest hackathon by collaborating with cross-functional teams to deliver a large-scale event for 700+ participants, ensuring smooth technical operations and participant experience.

Projects

RememberThroughMe (ConuHacks Hackathon Winner) | Source code

Python, MongoDB, OpenCV, Swift

- Engineered an award-winning AI system using FaceNet + OpenCV with encrypted MongoDB storage, earning Best Use of AI among 800+ participants and 180+ project submissions.

COMP250 Website (Received Undergraduate Teaching Award) | Deployed Site

React, Figma, Jest

- Developed and maintained a production-grade React platform serving 400+ students/semester, with CI/CD automation (tests + deploy) via GitHub Actions achieving >99.9% uptime and sub-3-minute builds.

BoardGameHub | Deployed Site | Source code

Java, SpringBoot, Vue, Junit, PostgreSQL, Docker

- Built a full-stack boardgame application with Spring Boot, Vue.js, and PostgreSQL; implemented JUnit test coverage, containerized services with Docker, and deployed reliably on Render.

Transformer-Based Scientific Text Classification | Source Code

Python, PyTorch, Hugging Face

- Designed and trained an end-to-end NLP pipeline for classifying 11,967 scientific abstracts into 7 coarse and 34 fine-grained fields, implementing a custom LSTM from scratch with dropout and gradient clipping and fine-tuning a pretrained BERT model.

Technical Skills

Languages: Python, Java, C/C++, JavaScript/TypeScript, SQL

Frameworks/Platforms/Tools: React, Spring Boot, Node.js/Express.js, Redux, Selenium, MongoDB, PostgreSQL, AWS, Docker, Kubernetes, Git, Github

ML/AI Libraries: NumPy, Pandas, TensorFlow, PyTorch, Scikit-learn, Hugging Face Transformers
